The Practical Skywatcher's Handbook Robert Burnham,John O'Byrne,David H. Levy,2012-01-05 This practical hands on guide is the sailor s essential atlas of the sky Assuming no prior knowledge this comprehensive practical handbook helps the user at sea or on land read and understand the changing sky Readers are given hands on advice on how to read the night sky and star charts as well as information on whether particular stars can be seen with the naked eye or require binoculars or a telescope At the core of the book are 150 sky charts showing what features can be seen in each position and when Every constellation in the northern and southern hemisphere is mapped out Simple methods are given for finding the biggest brightest stars and then identifying other lesser stars by their relative position For sailors out of the sight of land celestial navigation really comes into its own providing a sure means of checking the boat s position even when GPS and other electronics malfunction This book will provide a complete reference as to what stars and constellations they should be able to use when and where in the world The Practical Skywatcher s Handbook is ideal for anyone on land or sea wanting a complete guide to the night sky

Photo-guide to the Constellations C. R. Kitchin,2012-12-06 I hope that people all around the world never forget what a wonderful thing it is to lie on your back and look up at the stars Pete Seeger What is the fascination that constellations hold for people There are probably as many different answers to that question as there are people For many though the constellations are the stepping off point into the fabulous mind bending discoveries and concepts of modern astronomy For others it is their long and intriguing history that beckons For some people the constellations provide the means for navigation and orientation over the surface of the Earth and of course there are the millions who place some faith in horoscopes But for most people the patterns in the sky are a beautiful part of their environment to be treasured alongside the forests fields and rivers that make life worth living However just as we are losing our green environment to pollution so we are losing our sky The glow from cities across the world swamps the stars in the night sky Astronomers have had to retreat to remote mountain tops to escape that light pollution The rest of us must make do with what is available From the centre of a city or any other brightly lit area probably no stars at all will be visible even on the clearest of nights From the suburbs the brighter stars should normally be seen
