Anyone who wants to make a living from the treatment of nervous patients must clearly be able to do something to help them. It is amazing how frequently this simple precept is ignored and when a patient does not get well how often the failure is attributed to lack of proper motivation, diminutive ego strength, latent schizophrenia and a multitude of assorted resistances. Difficulties that arise during therapy are not due to a deliberate conspiracy of neglect on the part of the therapist. They usually come about because of obstructive situations that develop in work with patients with which the therapist is unprepared to cope. During his psychiatric career the author who spent time both teaching and supervising collected and collated questions from students and graduate therapists who had raised concerns about psychotherapy that related to such obstructive situations. Originally published in 1982, this volume contains both those questions and his answers.

Imaginary Penalties Pat Carlen, 2013-01-11. This book is concerned to explore the idea of imaginary penalties and to understand why the management of criminal justice and criminal justice systems has so often reached crisis point. Its underlying theme is that when political strategies of punitive populism are combined with managerialist techniques of social auditing, a new all-encompassing form of governance has emerged, powerless to deliver what it promises but with a momentum of its own and increasingly removed from proper democratic accountability. A highly distinguished international group of contributors explores this set of themes in a variety of different contexts taken from the UK, N America, Europe and Australia. It will be essential reading for anybody seeking to understand some of the root causes of increasing prison populations, social harms such as recidivism and domestic violence and the increasingly important role of criminal justice within systems of governance.
