Sky Catalogue 2000.0: Volume 1 Alan Hirshfeld, Roger W. Sinnott, Francois Ochsenbein, 1991-11-29 The one stop reference book for hard information on the brighter stars **Literature 1991, Part 2** Astronomisches Rechen-Institut, 2013-06-29 Astronomy and Astrophysics Abstracts appearing twice a year has become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world *The Observer's Guide to Astronomy: Volume 2* Patrick Martinez, 1994-09-22 How can you find new minor planets comets and novae How can you use photoelectric detectors to derive the temperatures of stars And how can you predict future eclipses and occultations of stars by minor planets The questions asked by serious amateur astronomers are answered in this authoritative and wide ranging guide first published in 1994 For each topic sound practical methods of observation and the scientific background are given to lead you to better observations Guidelines also show you how to record and catalogue your observations using the recognised professional terminology and classification schemes From the simplest pencil drawings of the moon to observations of the most distant galaxies with state of the art CCD cameras and photoelectric photometers this guide is packed with practical tips for all types of amateur observations It will develop the observational skills of the keen novice and satisfy the more demanding needs of the experienced amateur astronomer *Literature 1992, Part 1* Astronomisches Recheninstitut, 2013-11-11 Astronomy and Astrophysics Abstracts appearing twice a year has become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world

Observer's Handbook , 2009 **Observing the Caldwell Objects** David Ratledge, 2012-12-06 Background A new collection of deep sky targets for the modern amateur astronomer was long overdue The traditional catalogue of deep sky objects i e that produced by Messier over 200 years ago has become a victim of its own success Those objects have now become far too well known over viewed over imaged and over published More importantly they have often resulted in more interesting objects being totally overlooked The logic behind the compilation of Messier's objects was nothing more profound than that they might be confused for a comet There must be a better way to choose the best deep sky objects for the modern era It was time for a fresh approach Enter Patrick Moore As an active observer for over half a century and the last 40 years

of which as presenter of BBC TV's Sky at Night he has travelled all over the World and never missed the opportunity to observe the skies This has given him an in depth practical knowledge of deep sky objects in both northern and southern hemispheres Astronomical Applications of Astrometry M. A. C. Perryman, 2009 The Hipparcos satellite developed and launched by the European Space Agency ESA in 1989 was the first space mission dedicated to astrometry the accurate measurement of positions distances and proper motions of stars Amongst the key achievements of its measurements are refining the cosmic distance scale characterizing the large scale kinematic motions in the Solar neighborhood providing precise luminosities for stellar modelling and confirming Einstein's prediction of the effect of gravity on starlight This authoritative account of the Hipparcos contributions over the last decade is an outstanding reference for astronomers astrophysicists and cosmologists It reviews the applications of the data in different areas describing the subject and the state of the art before Hipparcos and summarizing all major contributions to the topic made by Hipparcos It contains a detailed overview of the Hipparcos and Tycho Catalogues their annexes and their updates Each chapter ends with comprehensive references to relevant literature Literature 1988, Part 1 U. Esser, H. Hefele, Inge Heinrich, W. Hofmann, D. Krahn, V. R. Matas, Dr. Lutz D. Schmadel, G. Zech, 2013-11-11 From the reviews Astronomy and Astrophysics Abstracts has appeared in semi annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world Space Science Reviews 1 Dividing the whole field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts Fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use The series appears to be so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes The Observatory Magazine 2 **Subject Guide to Books in Print**, 2001
