to be prominent in our region conflict or even incompatibility between negation and focus use of other indirect means of negating non indicative mood covered under the term Prohibitive different negation patterns in different Tense Aspect Moods e g Imperfective vs Perfective lack of negative indefinites and disjunctive negative marking often referred to as double negation The articles presented here show that areal factors have played a significant role in the development of negation strategies in the languages of West Africa and beyond On the other hand genetic factors seem to be less prominent

Studies in African Linguistic Typology F. K. Erhard Voeltz, 2006-03-22 The twenty one papers that make up this volume reflect the broad perspective of African linguistic typology studies today Where previous volumes would present language material from a very restricted area and perspective the present contributions reflect the global interest and orientation of current African linguistic studies The studies are nearly all implicational in nature Based upon a detailed survey of a particular linguistic phenomenon in a given language or language area conclusions are drawn about the general nature about this phenomenon in the languages of Africa and beyond They represent as such a first step that may ultimately lead to a more thorough understanding of African linguistic structures This approach is well justified Taking the other road attempting to pick out linguistic details from often fairly superficially documented languages runs the risk that the data and its implications for the structure investigated might be misunderstood Consequentially only very few studies of this nature giving the very broad perspective the overview of a particular structure type covering the whole African continent are represented here

Verbal Plurality and Distributivity Patricia Cabredo Hofherr, Brenda Laca, 2012-10-01 This volume brings together novel analyses of verbal plurality and distributivity The contributions draw on a wide range of new empirical data from languages as diverse as Arabic Cusco Quechua European Portuguese Hausa Karitiana Modern Hebrew and Russian The introductory chapter gives an overview of the central issues that underlie much recent research on the semantics of event plurality The papers on verbal plurality explore the interaction between verbal plurality and plural arguments in Arabic and European Portuguese the semantics of additive particles in Modern Hebrew the semantics of a range of pluractional markers in Cusco Quechua and the morphological variability of pluractional markers cross linguistically The papers on distributivity examine the syntax and semantics of reduplicated numerals in Karitiana and adnominal distributive markers This volume will be of interest to researchers and students in syntax formal semantics and language typology

A Guide to Gender and Classifiers Alexandra Y. Aikhenvald, 2025-03-21 This book explores the range of noun categorization devices found in the languages of the world from the numeral classifier systems of Southeast Asia to the highly grammaticalized gender agreement classes in Indo European languages It shows how these devices provide unique insights into how people categorize the world through the language
