In diverse case studies in Egypt, France, India, Iran, Jordan, Morocco, Syria and Tunisia, by addressing not only urban and architectural heritage but also socio-cultural, environmental and political issues including economic challenges and climatic concerns, this book is an essential resource for scholars and researchers across fields including architecture, civil engineering, urban planning, sociology and philosophical anthropology. Revitalization in Asia Lavina Ahuja, Lynne D. DiStefano, 2025-03-05. *Revitalization in Asia: Adaptive Reuse in Macao, Mumbai and Penang* offers a clear understanding of the value of sustainable adaptive reuse within an Asian context. Three highly urbanized places—Macao, Mumbai and Penang—are considered in detail from conservation and planning perspectives, with essays and timelines for each. For each place, five case studies offer a comparative framework for understanding similarities and differences in adaptive reuse projects. Six essays examine adaptive reuse in terms of its connection to the three dimensions of sustainability with reference to the United Nations Sustainable Development Goals. This book is envisioned as a continuation of *Asian Revitalization: Adaptive Reuse in Hong Kong, Shanghai and Singapore*. Richard A. Engelhardt, UNESCO. Following the acclaimed *Asian Revitalization* and using a similar format, this latest book looks at three more Asian cities. The benefits of adaptive reuse as an economic driver are discussed, as are the vagaries of tourism. It is an essential reference for practitioners and decision makers in government and private enterprise. It is also a very good read. Brian Anderson, The Chinese University of Hong Kong. *Revitalization in Asia* is a highly informative and well-documented volume that significantly extends our understanding of adaptive reuse across Asia. It focuses on real-life issues, case studies and challenges faced when adopting a sustainability mindset in conservation practice. A must-read not just for researchers and practitioners in the field but also for those curious about this increasingly popular approach to conservation. Miles Glendinning, University of Edinburgh. Adaptive reuse is a familiar term, but this volume has teased out its nuances through thematic essays and case studies from three Asian cities. Curated carefully to relate theory with practice and to provoke further thinking, it is a recommended publication for students and practitioners alike. Neel Kamal Chapagain, Ahmedabad University.
