**Gunpowder, Explosives and the State** Brenda J. Buchanan,2006

Gunpowder studies are still in their infancy despite the long standing civil and military importance of this explosive since its discovery in China in the mid ninth century AD This volume is the first to develop the implications of the subject not just in the sense of relating it to changing military technologies but in that of seeing the securing of gunpowder supplies as fundamental to the power of the state and imperial pretensions

*Dangerous Energy* Wayne D. Cocroft,2014-06-15 This book comprises a national study of the explosives industry and provides a framework for identification of its industrial archaeology and social history Few monuments of gunpowder manufacture survive in Britain from the Middle Ages although its existence is documented Late 17th century water powered works are identifiable but sparse In the later 18th century however the industry was transformed by state acquisition of key factories notably at Faversham and at Waltham Abbey In the mid 19th

century developments in Britain paralleled those in continental Europe and in America namely a shift to production on an industrial scale related to advances in armaments technology The urgency and large scale demands of the two world wars brought state directed or state led solutions to explosives production in the 20th century The book s concluding section looks at planning preservation conservation and presentation in relation to prospective future uses of these sites Gunpowder Industry Glenys Crocker,2008-03-04 Outlines the history of the gunpowder industry ,
