Sky Fever Sir Geoffrey De Havilland, 1961 *Sky Fever: the Autobiography of Sir Geoffrey de Havilland, C.B.E.* Sir Geoffrey DE HAVILLAND, 1961 *Sky Fever* Geoffrey De Havilland, 1999-07-01 *The Man Who Built the Swordfish* Adrian Smith, 2018-04-30

Sir Richard Fairey was one of the great aviation innovators of the twentieth century. His career as a plane maker stretched from the Edwardian period to the jet age; he lived long enough to see one of his aircraft be the first to break the 1000mph barrier and at least one of his designs, the Swordfish, holds iconic status. A qualified engineer, party to the design, development and construction of the Royal Navy's state-of-the-art sea planes, Sir Richard founded Fairey Aviation at the Admiralty's behest in 1915. His company survived post-war retrenchment to become one of Britain's largest aircraft manufacturers. The firm built a succession of front-line aircraft for the RAF and the Fleet Air Arm, including the iconic Swordfish. In addition, Fairey Aviation designed and built several cutting-edge experimental aircraft, including long-distance record breakers between the wars and the stunningly beautiful Delta 2, which broke the world speed record on the eve of Sir Richard's death in 1956. Fairey also came to hold a privileged position in the British elite, courting politicians and policymakers. He became a figurehead of the British aviation industry and his successful running of the British Air Commission earned him a knighthood. A key player at a pivotal moment, Fairey's life tells us much about the exercise of power in early twentieth-century Britain and provides an insight into the nature of the British aviation manufacturing industry at its wartime peak and on the cusp of its twilight years.

A History of the Royal Navy: World War I Mike Farquharson-Roberts, 2014-07-08

World War I is one of the iconic conflicts of the modern era. For many years, the war at sea has been largely overlooked, yet at the outbreak of that war, the British Government had expected and intended its military contribution to be largely naval. This was a war of ideologies fought by and for empires. Britain was not defending simply an island; it was defending a far-flung empire. Without the navy, such an undertaking would have been impossible. In many respects, the Royal Navy fought along the longest front of any fighting force of the Great War, and it acted as the leader of a large alliance of navies. The Royal Navy fought in the North and South Atlantic, in the North and South Pacific; its ships traversed the globe from Australia to England, and its presence extended the war to every continent except Antarctica. Because of the Royal Navy, Britain could finance and resource not only its own war effort but that of its allies. Following the naval arms race in the early 20th century, both Britain and Germany were equipped with the latest naval technology, including revolutionary new vessels such as dreadnoughts and diesel-powered submarines. Although the Royal Navy's operations in World War I were global, a significant proportion of the fleet's strength was concentrated in the Grand Fleet, which confronted the German High Seas Fleet across the North Sea. At the Battle of Jutland in 1916, the Royal Navy, under the command of Admiral Jellicoe, fought an iconic if inconclusive battle for control of shipping routes. The navy might not have been able to win the war, but as Winston Churchill put it, she could lose it in an afternoon. The Royal Navy was British power.

and prestige 43 244 British navy personnel would lose their lives fighting on the seas in World War I This book tells their story and places the Royal Navy back at the heart of the British war effort showing that without the naval dimension the First World War would not have been a truly global conflict

Secret Warriors Taylor Downing, 2015-04-15 World War I is often viewed as a war fought by armies of millions living and fighting in trenches aided by brutal machinery that cost the lives of many But behind all of this an intellectual war was also being fought between engineers chemists code breakers physicists doctors mathematicians and intelligence gatherers This hidden war was to make a positive and lasting contribution to how war was conducted on land at sea and in the air and most importantly life at home Secret Warriors provides an invaluable and fresh history of the World War I profiling a number of the key incidents and figures which lead to great leaps forward for the twentieth Century Told in a lively and colorful narrative style Secret Warriors reveals the unknown side of this tragic conflict

The Birth of Military Aviation Hugh Driver, 1997 A survey of the development of British military aviation from 1903 to 1914 revealing the consequences of its annexation by the state as a branch of armaments as an underlying cause of aircraft inadequacies on the outbreak of war A mine of information drawing on an impressive range of archives It will become an important point of reference

ENGLISH HISTORICAL REVIEW This book aims to demonstrate how the crisis evident in British military aviation in the early years of the First World War was inherent in the entire development of aviation in the years preceding the conflict After outlining the work of the early pioneers and the growth of an aviation industry as a branch of armaments Dr Driver considers the objectives of the War Office in increasingly seeking to divert design development to their research establishment at Farnborough He shows how the resultant virtual state monopoly in design and procurement had disastrous consequences for aircraft innovation and development suffocating both competition and initiative and leading to the maintenance of inadequate aircraft by the Royal Flying Corps following the outbreak of war The continuing dispute and its culmination in the Fokker Scourge controversy of 1915 1916 graphically characterise the strained development of military industrial relations in this area Dr HUGH DRIVER gained an MA in War Studies from King's College London and a D Phil in modern history at Oriel College Oxford

Speedbird Robin Higham, 2013-05-30 Between 1939 and 1946 BOAC the British Overseas Airways Corporation was the nationalised airline of Great Britain and between 1946 and 1974 as such it exclusively operated all long haul British flights With its iconic Speedbird logo and its central role in the glamorous jet age of the 1950s and 1960s BOAC achieved a near cult status with admirers around the globe Yet to date there has been no comprehensive history of the organisation covering its structure fleet and the role it played in the critical events of the age from World War II to the end of empire a period when BOAC played a pivotal part in projecting British political power even as that power was waning During World War II BOAC operated a limited wartime service and prepared for the return of commercial flight in the postwar era But it was in the service of

Britain's colonies and latterly the process of decolonisation that BOAC achieved its most pivotal role. The development of flight technology enabled much faster connections between Britain and her imperial possessions as the colonies prepared for independence. BOAC ferried diplomats, politicians and colonial administrators between London and the far flung corners of Africa and Asia in much faster times than had previously been possible. In this book, acclaimed historian Robin Higham presents a unique comprehensive study of BOAC from the early jet travel of the de Havilland Comet and the Vickers VC10 to the dawn of supersonic passenger aviation. Highly illustrated and meticulously researched using previously unseen sources, this book will be essential reading for all aviation enthusiasts and anyone interested in the history of modern Britain. **Lady**

Almina and the Real Downton Abbey The Countess of Carnarvon, 2011-12-27 The real life inspiration and setting for the Emmy Award winning *Downton Abbey*. Lady Almina and the Real Downton Abbey tells the story behind Highclere Castle and the life of one of its most famous inhabitants, Lady Almina, the 5th Countess of Carnarvon. Drawing on a rich store of materials from the archives of Highclere Castle, including diaries, letters and photographs, the current Lady Carnarvon has written a transporting story of this fabled home on the brink of war. Much like her Masterpiece Classic counterpart, Lady Cora Crawley, Lady Almina was the daughter of a wealthy industrialist, Alfred de Rothschild, who married his daughter off at a young age, her dowry serving as the crucial link in the effort to preserve the Earl of Carnarvon's ancestral home. Throwing open the doors of Highclere Castle to tend to the wounded of World War I, Lady Almina distinguished herself as a brave and remarkable woman. This rich tale contrasts the splendor of Edwardian life in a great house against the backdrop of the First World War and offers an inspiring and revealing picture of the woman at the center of the history of Highclere Castle. The

Dean and DeLuca Cookbook David Rosengarten, Lori Longbotham, 1996 Accompanied by tips on adapting a variety of new and traditional ingredients to the needs of the modern kitchen, a collection of four hundred taste-tempting recipes emphasizes fresh, wholesome and stylish foods. Simultaneous 50,000 first printing. **Making the World Safe for Tourism** Patricia

Goldstone, 2001-01-01 A study of the social and political impacts of tourism. It explores how and why tourism aligned itself with political power, how it became embedded within non-tourist institutions like the World Bank, and how, since World War II, it has become an instrument of international development policy. *The Women of the Real Downton Abbey* The Countess of

Carnarvon, 2013-10-29 This collection, available exclusively as an ebook, brings together two tales of Highclere Castle, the grand estate that serves as the central character for the hit PBS show *Downton Abbey* from the current Countess of Carnarvon. A New York Times bestseller, *Lady Almina and the Real Downton Abbey* contrasts the splendor of Edwardian life in a great house against the backdrop of the First World War and offers an inspiring and revealing picture of Lady Almina, the woman at the center of the history of Highclere Castle. *Lady Catherine, the Earl and the Real Downton Abbey* transports readers to the 1920s and 1930s as the nations of Europe inched towards war and tells the story of Catherine Wendell, the beautiful and spirited American woman who married Lady Almina's son, the man who would become the 6th Earl of

Carnarvon Using copious materials including diaries and scrapbooks from the castle's archives the current Countess of Carnarvon brings these stories to life in a beautiful and fabled setting

Taking Flight Richard Hallion, 2003-05-08 The invention of flight represents the culmination of centuries of thought and desire Kites and rockets sparked our collective imagination Then the balloon gave humanity its first experience aloft though at the mercy of the winds The steerable airship that followed had more practicality yet a number of insurmountable limitations But the airplane truly launched the Aerial Age and its subsequent impact from the vantage of a century after the Wright Brothers' historic flight on December 17 1903 has been extraordinary Richard Hallion a distinguished international authority on aviation offers a bold new examination of aircraft history stressing its global roots The result is an interpretive history of uncommon sweep complexity and warmth Taking care to place each technological advance in the context of its own period as well as that of the evolving era of air travel this ground breaking work follows the pre history of flight the work of balloon and airship advocates fruitless early attempts to invent the airplane the Wright brothers and other pioneers the impact of air power on the outcome of World War I and finally the transfer of prophecy into practice as flight came to play an ever more important role in world affairs both military and civil Making extensive use of extracts from the journals diaries and memoirs of the pioneers themselves and interspersing them with a wide range of rare photographs and drawings Taking Flight leads readers to the laboratories and airfields where aircraft were conceived and tested Forcefully yet gracefully written in rich detail and with thorough documentation this book is certain to be the standard reference for years to come on how humanity came to take to the sky and what the Aerial Age has meant to the world since da Vinci's first fantastical designs

England and the Aeroplane David Edgerton, 2013-04-04 The story of the strange mixture of romanticism militarism and technology that has made planes so important to England from the brilliant author of Britain's War Machine The history of England and the aeroplane is one tangled with myths of the Few and the Blitz of boffins flying machines amateur inventors and muddling through In *England and the Aeroplane* David Edgerton reverses received wisdom showing that the aeroplane is a central and revealing aspect of an unfamiliar English nation a warfare state dedicated to technology industry empire and military power England had the strongest air force in the Great War the largest industry in the world in the 1920s outproduced Germany by 50% at the time of the Battle of Britain and was the third largest producers of aeroplanes well after this time In a revelatory recounting of the story of aeronautical England from its politics to its industry and culture David Edgerton reconfigures some of the most important chapters of our history

Reviews A brilliant polemic Guardian Full of good stories an illuminating read Spectator A tour de force after which the history of the aircraft industry will never be quite the same again Business History David Edgerton's sure footed essay sees Britain from an unusual perspective His arguments provide sound backing for the idea that modern Britain is as much a warfare state as a welfare one Economist About the author David Edgerton is Hans Rausing Professor at Imperial College London where he was the founding director of the Centre for the History of Science Technology
