Encyclopedia of Contemporary Literary Theory Irene Rima Makaryk, 1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture

nevertheless made it into Western scholarly discourses via exiled scholars. Some of these scholars such as Mikhail Bakhtin became widely known in the West and their thought was transposed onto new Western cultural contexts; others such as Olga Freidenberg were barely noticed outside of Russian and Poland. This volume draws attention to the schools, circles, and concepts that shaped the development of theory in Central and Eastern Europe as well as the history of translations, transformations, and migrations that conditioned its relationship with the West.

Stanislaw Brzozowski and the Migration of Ideas Jens Herlth, Edward M. Swiderski, 2019-01-18. As a writer, critic, and philosopher, Stanislaw Brzozowski (1878-1911) left a lasting imprint on Polish culture. He absorbed virtually all topical intellectual trends of his time, adapting them for the needs of what he saw as his primary mission: the modernization of Polish culture. The essays of the volume reassess and contextualize Brzozowski's writings from a distinctly transnational vantage point. They shed light on often surprising and hitherto underrated affinities between Brzozowski and intellectual figures and movements in Eastern and Western Europe. Furthermore, they explore the presence of his ideas in twentieth-century literary criticism and theory.

The Origins of Russian Literary Theory Jessica Merrill, 2022-07-15. Russian Formalism is widely considered the foundation of modern literary theory. This book reevaluates the movement in light of the current commitment to rethink the concept of literary form in cultural-historical terms. Jessica Merrill provides a novel reconstruction of the intellectual-historical context that enabled the emergence of Formalism in the 1910s. Formalists adopted a mode of thought; Merrill calls the philological paradigm a framework for thinking about language, literature, and folklore that lumped them together as verbal tradition. For those who thought in these terms, verbal tradition was understood to be inseparable from cultural history. Merrill situates early literary theories within this paradigm to reveal abandoned paths in the history of the discipline—ideas that were discounted by the structuralist and post-structuralist accounts that would emerge after World War II. *The Origins of Russian Literary Theory* reconstructs lost Formalist theories of authorship, of the psychology of narrative structure, and of the social spread of poetic innovations. According to these theories, literary form is always a product of human psychology and cultural history. By recontextualizing Russian Formalism within this philological paradigm, the book highlights the aspects of Formalism's legacy that speak to the priorities of twenty-first-century literary studies.

Empire De/Centered Maxim Waldstein, Sanna Turoma, 2016-05-06. In 1991, the Soviet empire collapsed with a stroke, throwing the certainties of the Cold War world into flux. Yet despite the dramatic end of this last empire, the idea of empire is still alive and well, its language and concepts feeding into public debate and academic research. Bringing together a multidisciplinary and international group of authors to study Soviet society and culture through the categories of empire and space, this collection demonstrates the enduring legacy of empire with regard to Russia, whose history has been marked by a particularly close and ambiguous relationship between nation and empire-building and between national and imperial.

identities Parallel with this discussion of empire the volume also highlights the centrality of geographical space and spatial imaginings in Russian and Soviet intellectual traditions and social practices underlining how Russia's vast geographical dimensions have profoundly informed Russia's state and nation building both in practice and concept Combining concepts of space and empire the collection offers a reconsideration of Soviet imperial legacy by studying its cultural and societal underpinnings from previously unexplored perspectives In so doing it provides a reconceptualization of the theoretical and methodological foundations of contemporary imperial and spatial studies through the example of the experience provided by Soviet society and culture *Russian Philosophy in the Twenty-First Century* Mikhail Sergeev, Alexander N. die fiktiven Welten In vergleichenden Studien werden die russische Kompositionstheorie die Autorthorien des slavischen Funktionalismus formalistische Film und Theaterkonzepte und die narrative Semantik in der Konzeption des Prager Strukturalismus behandelt Der Bogen der besprochenen Theoretiker reicht vom russischen Formalisten Viktor Sklovskij und dem formalismunahen Kompositionstheoretiker Michail Petrovskij ber die tschechischen Strukturalisten Jan Muka ovsk Felix Vodi ka und Lubom r Dole el bis zur Zentralfigur der Moskau Tartu Schule Jurij Lotman

The Phoenix of Philosophy Mikhail Epstein, 2019-06-27 This groundbreaking work by one of the world s foremost theoreticians of Russian literature culture and thought gives for the first time an extensive and detailed examination of the development of Russian thought during the late Soviet period Countering the traditional view of an intellectual wilderness under the Soviet regime Mikhail Epstein offers a systematic account of Russian thought in the second half of the 20th century In doing so he provides new insights into previously ignored areas such as Russian liberalism personalism structuralism neo rationalism and culturology Epstein shows how Russian philosophy and culture has long been trapped in an intellectual prison of its own making as it sought to create its own utopia However he demonstrates that it is time to reappraise Russian philosophical thought and cultural theory now freed from the bonds of totalitarianism We are left with not only a new and exciting interpretation of Russian thought but also an opportunity to rethink our own intellectual heritage Politicizing Magic
