The background of the cover is a dynamic, swirling blue and white pattern, resembling a vortex or a high-speed camera shot of water. In the center, a large, detailed cobra is coiled, its head raised and mouth open, showing its tongue and fangs. The cobra's body is a mix of dark and light scales, and its eyes are a bright, glowing yellow.

*Monstrous Nature* Robin L. Murray, Joseph K. Heumann, 2016

*Godzilla*, a traditional natural monster and representation of cinema's subgenre of natural attack, also provides a cautionary symbol of the dangerous consequences of mistreating the natural world. *Monstrous Nature* on the attack. Horror films such as *Godzilla* invite an exploration of the complexities of a monstrous nature that humanity both creates and embodies. Robin L. Murray and Joseph K. Heumann demonstrate how the horror film and its offshoots can often be understood in relation to a monstrous nature that has evolved either deliberately or by accident and that generates fear in humanity as both character and audience. This connection between fear and the natural world opens up

possibilities for ecocritical readings often missing from research on monstrous nature the environment and the horror film Organized in relation to four recurring environmental themes in films that construct nature as a monster anthropomorphism human ecology evolution and gendered landscapes the authors apply ecocritical perspectives to reveal the multiple ways nature is constructed as monstrous or in which the natural world itself constructs monsters This interdisciplinary approach to film studies fuses cultural theological and scientific critiques to explore when and why nature becomes monstrous *The Suburban Gothic in American Popular Culture* B.
