Cantonese Opera Bell Yung,1989-05-11 This book examines Cantonese opera one of the grandest of the traditional musical theatres in China

Lead Sister: The Story of Karen Carpenter Lucy O'Brien,2023-03-02 When the Carpenters first toured Japan a journalist mistakenly referred to Karen as the lead sister of the band This designation stuck and Karen liked it so much that she had a T shirt custom made with the slogan which she wore while drumming on the band s 1976 world tour The term also sums up the approach of this biography a celebratory re evaluation of a pioneering woman As one of the biggest selling acts of the 1970s sibling duo Richard and Karen Carpenter created lush soundscapes of melodic pop producing global hits like We ve Only Just Begun Top of the World and Close to You However though Karen is rightly recognised as one of the greatest singers in popular music the tragedy of her early death in 1983 at the age of just thirty two often overshadows all that she achieved She has long been portrayed as a victim controlled by her family and exploited by the music industry This book now seeks to reframe her life and legacy Through fresh interviews with friends musicians and co workers bestselling author Lucy O Brien s fascinating profile explores Karen s contributions in the studio as a singer drummer arranger and producer as well as tracing the roots of the Carpenters sound and of Karen s distinctive vocals Forty years after her death it also honours the lead sister s achievements in the face of her struggle with anorexia as viewed through the lens of new perspectives on eating disorders and mental health Yet despite the chronic nature of her illness Karen Carpenter was above all a creative dedicated and assured artist whose music delivers an emotional resonance that has transcended generations and that is how she should be remembered

Insect Hearing and Acoustic Communication Berthold Hedwig,2013-11-08 This volume provides a comprehensive

selection of recent studies addressing insect hearing and acoustic communication The variety of signalling behaviours and hearing organs makes insects highly suitable animals for exploring and analysing signal generation and hearing in the context of neural processing ecology evolution and genetics Across a variety of hearing species like moths crickets bush crickets grasshoppers cicadas and flies the leading researchers in the field cover recent scientific progress and address key points in current research such as How can we approach the evolution of hearing in insects and what is the developmental and neural origin of the auditory organs How are hearing and sound production embedded in the natural lifestyle of the animals allowing intraspecific communication but also predator avoidance and even predation What are the functional properties of hearing organs and how are they achieved at the molecular biophysical and neural levels What are the neural mechanisms of central auditory processing and signal generation The book is intended for students and researchers both inside and outside of the fascinating field of bioacoustics and aims to foster understanding of hearing and acoustic communication in insects

Comparative Hearing: Insects Ronald R. Hoy, Richard R. Fay, 2012-12-06 The Springer Handbook of Auditory Research presents a series of comprehensive and synthetic reviews of the fundamental topics in modern auditory research The volumes are aimed at all individuals with interests in hearing research including advanced graduate students postdoctoral researchers and clinical investigators The volumes are intended to introduce new investigators to important aspects of hearing science and to help established investigators to better understand the fundamental theories and data in fields of hearing that they may not normally follow closely Each volume is intended to present a particular topic comprehensively and each chapter serves as a synthetic overview and guide to the literature As such the chapters present neither exhaustive data reviews nor original research that has not yet appeared in peer reviewed journals The volumes focus on topics that have developed a solid data and conceptual foundation rather than on those for which a literature is only beginning to develop New research areas will be covered on a timely basis in the series as they begin to mature
