The New Music Theater Eric Salzman, Thomas Desi, 2008-11-06 Alternatives to grand opera and the popular musical can be traced at least as far back as the 1912 premiere of Schoenberg s Pierrot Lunaire Yet this ongoing history has never been properly sorted out its complex ideas and philosophy as well as musical and theatrical achievements never brought fully to light The New Music Theater is the first comprehensive attempt in English to cover this still emerging art form in its widest range This book provides a wealth of examples and descriptions not only of the works themselves but of the concepts ideas and trends that have gone into the evolution of what may be the most central performance art form of the post modern world Authors Salzman and Desi consider the subject of music theatre from a social as well as artistic point of view exploring how theatre works in culture and how music works in the theatre Illuminating their discussion with illustrations from current artists and their works The New Music Theater both describes where we have been and points the way to the future of this all encompassing art form **Music, Theater, and Cultural Transfer** Annegret Fauser, Mark Everist, 2009-12-15 Opera and musical theater dominated French culture in the 1800s and the influential stage music that emerged from this period helped make Paris as Walter Benjamin put it the capital of the nineteenth century The fullest account available of this artistic

ferment and its international impact Music Theater and Cultural Transfer explores the diverse institutions that shaped Parisian music and extended its influence across Europe the Americas and Australia The contributors to this volume who work in fields ranging from literature to theater to musicology focus on the city s musical theater scene as a whole rather than on individual theaters or repertoires Their broad range enables their collective examination of the ways in which all aspects of performance and reception were affected by the transfer of works performers and management models from one environment to another By focusing on this interplay between institutions and individuals the authors illuminate the tension between institutional conventions and artistic creation during the heady period when Parisian stage music reached its zenith
