Plant Souls Speak Robert Shapiro, 2011-08-01 Plant Energies Available to You Live Plant 100% Dead Plant 10% What we intend to speak about in this book if I may speak in general for all plants is how you as the human species can interact with plants in a more benevolent way For a long time you have been clear about the medicinal uses of leaves and stems and seeds and flower petals and so on but you are only getting about one tenth of the energy available to you in this way It is always better to interact with the plant and its energies in its live form but you need to know how The intention of this book is to reveal that formula so that you can stop searching for magical cures to diseases by exhausting the supply of life forms around you A much simpler process is available This book will not just comment on things you know about but show you what you are missing in your interaction with plants Dandelion In this book the plant world will speak through elders This has certain advantages allowing them to include knowledge and wisdom about their home planets In this way you will learn some of the old wisdom again shared so that you can discover how to interact with the plants while they are alive while they are a portion of the Creator of All Things With this you will learn the beginnings the reminders and for many of you the fulfillment of the transformation of that which does not work in your body in your life in your community and in your world the transformation of what you call dis ease or disharmony into harmony and ease Zoosh Isis and Grandfather Each plant brings a wondrous gift to share with humanity enjoy it

the Ninth Seminar of the IATS, 2000. Volume 8: Tibet, Self, and the Tibetan Diaspora P. Christiaan

Klieger, 2021-11-15 The ten papers presented in this eighth volume of the Proceedings of the Ninth Seminar of the IATS 2000 provide examples of the colourful and lively range of Tibetan self-expressions that exist within the modern homeland and in exile. The scholars here represent the fields of anthropology, sociology, literary studies, history and political science. Four papers are based in studies in the modern Tibet Autonomous Region, five are grounded in the Tibetan diaspora and one deals with both classical Tibetan history and current affairs. The mass representation of Tibetan self delivered through various literary vehicles by linguistic competence, body decoration, landscape or individual deportment constitutes the basic theme of this collection. The volume is useful for any student of Tibet and those interested in the process of identity formation and presentation. **Rgyalrong Conservation and Change: Social Change On the Margins of Tibet** David

Burnett, 2014-11-25 The explosive growth of China's economy since the late 1970s has impacted the whole world including the minority peoples in the west of China, people like the Qiang, Tibetans and Yi. Based on fieldwork in the high valleys of the eastern margins of the Qinghai Tibetan plateau, David Burnett has produced a unique study of a people known as the Rgyalrong, officially classed as Tibetans. The Rgyalrong have been impacted by secular education, tourism and migration to the cities that have resulted from economic reform. Amidst these changes they endeavour to retain something of their traditional customs, songs, festivals, arts and crafts. They are a people who realize that if they lose their unique culture they will lose their very identity. The issues raised in this book relate not only to the Rgyalrong but to minority peoples everywhere as they experience the forces of globalization.
