Dietrich Eminent Scholar Chair in Philosophy at Florida Atlantic University and the Center for Advanced Research in Phenomenology Inc Several essays have been added including the Husserl ineditum and its translation The intention of the project was to attract even wider appreciation for this posthumous work by Husserl especially since it has now been first translated into English by Andre Schuwer and Richard Rojcewicz In manuscript form the Ideas II was known to Martin Heidegger and Maurice Merleau-Ponty before *Sein und Zeit* 1927 and *Phänomenologie der Wahrnehmung* 1945 as well to Edith Stein and Ludwig Landgrebe of course who worked on it as Husserl's assistants It was published in 1952 as Volume IV of the Husserliana series and critical studies of that volume were written by Paul Ricoeur and Alfred Schutz Now that there is an English translation it is increasingly being taught in the United States along with the Ideas I *The Cambridge Companion to Husserl* Barry Smith, David Woodruff Smith, 1995-05-26 Exploring the full range of Husserl's work these essays reveal just how systematic his philosophy is An underlying theme is resistance to the idea current in much intellectual history of a radical break between modern and postmodern philosophy with Husserl as the last of the great Cartesians Emotion, Depth, and Flesh: A Study of Sensitive Space Suzanne L. Willis,2023-12-28 **About Face** Richard T. Gray,2004 A critical history of physiognomic thought in German speaking Europe that traces the roots of twentieth century racial profiling to the Enlightenment Once associated with astrology and occultist prophecy the art of interpreting personal character based on facial and other physical features dates back to antiquity About Face tells the intriguing story of how physiognomics became particularly popular during the Enlightenment no longer as a mere parlor game but as an empirically grounded discipline The story expands to illuminate an entire tradition within German culture stretching from Goethe to the rise of Nazism In About Face Richard T Gray explores the dialectical reversal from the occult to the scientific realm that entered physiognomic thought in the late eighteenth century beginning with the positivistic writings of the Swiss pastor Johann Caspar Lavater Originally claimed to promote understanding and love physiognomics devolved into a system aimed at valorizing a specific set of physical moral and emotional traits and stamping everything else as deviant This development not only reinforced racial national and characterological prejudices but lent such beliefs a presumably scientific grounding In the period following World War I physiognomics experienced yet another unprecedented boom in popularity Gray explains how physiognomics had by then become a highly respected super discipline that embraced many prominent strands of German thought the Romantic philosophy of nature the life philosophy propagated by Dilthey and Nietzsche the cultural pessimism of Schopenhauer Husserl s method of intuitive observation Freudian psychoanalysis and early twentieth century eugenics and racial biology A rich exploration of German culture About Face offers fresh insight into the intellectual climate that allowed the dangerous thinking of National Socialism to take hold

Resistance of the Sensible World Emmanuel Alloa,2017-05-01 In this book Emmanuel Alloa offers a handrail for venturing into the complexities of the work of the French philosopher Maurice Merleau Ponty 1908 61 Through a

comprehensive analysis of the three main phases of Merleau Ponty's thinking and a thorough knowledge of his many unpublished manuscripts the author traces how Merleau Ponty's philosophy evolved and exposes the remarkable coherence that structures it from within. Alloa teases out the continuity of a motive that traverses the entire oeuvre as a common thread. Merleau Ponty struggled incessantly against any kind of ideology of transparency whether of the world or of the self or of knowledge or of the self's relation to others. Already translated into several languages, Alloa's innovative reading of this crucially important thinker shows why the issues Merleau Ponty raised are more than ever those of our time. A Multidimensional and Cross-spherical Study of Cognitive Metaphorology Yi Sun, 2025-09-01 This book aims to illustrate and explain the Cognitive Metaphorology from experiential and cultural perspectives and highlights two prominent features of cognitive metaphor: multidimensionality and cross-sphere application. This book demonstrates that embodied experience is the shared philosophical basis of commonalities underlying the similarities in these metaphors across Chinese and English. National and cultural factors introduce variations in metaphors between the two languages. The different cultural aspects revealed through metaphors related to human body parts, emotions, senses, time, colors, and animals may appeal to academic readers interested in language studies or diverse cultures. *Edmund Husserl Bibliography* Steven Spileers, 2013-03-09 This bibliography contains the publications of Husserl and the main secondary literature on Husserl from Husserl's earliest publication 1887 till today 1997. As the collection of material was concluded in June 1997, the list of publications for the year 1997 is of course incomplete. In this bibliography, publications in the following languages have been included: German, English, French, Italian, Spanish, Portuguese, and Dutch for both primary and secondary literature. Since this bibliography has been based primarily on the consultation of the included documents and not restricted to copying already existing bibliographies, it was not possible to include publications in languages other than those mentioned. The bibliography has been constructed in the following way: 1. The list of Husserl's works and secondary literature by individual authors is preceded by a list of all edited volumes in which a text by or on Husserl is published. This list is ordered chronologically and runs from 1921 till 1997 inclusive. Edited volumes of the same year are classified according to language and this in the order mentioned above: German, English, French, etc. Edited volumes with a title in more than one language are classified according to the above order of languages; this of course concerns only the title of the edited volume, not the titles of the individual contributions. This order is maintained throughout the other parts of the bibliography.
