Signs of Reincarnation James G. Matlock, 2019-06-15 Signs of Reincarnation provides the first comprehensive look at the belief in reincarnation and the evidence for past lives from historical records anthropological studies and contemporary research Matlock discusses various ways the evidence may be interpreted and shows that although reincarnation entails a rejection of the materialist notion that consciousness is generated by the brain it does not require the acceptance of any radically new concepts or the abandonment of well established findings in mainstream psychology or biology This book offers students scholars and anyone interested in the possibility of reincarnation an essential grounding in beliefs cases and theory

while opening doors for future research into the extension of consciousness beyond our present lives **The Complete Idiot's Guide to Discovering Your Past Lives, 2nd Edition** Michael Hathaway, 2011-05-03 Unlock the mystery of your past lives and discover your future potential By discovering your past lives you can unlock the secret influence they have on your present one enabling you to enjoy greater balance success and happiness This edition has been revised and updated to address the questions people are asking now It includes new case histories a new chapter Healing the Past exploring past lives in which a traumatic event has impeded a person's growth in their current life as well as new information on Twin Flames two souls who begin their journey as one energy and then travel through lifetimes independently Science as a Spiritual Practice Imants Barušs, 2015-10-21 Science as a Spiritual Practice is in three parts In the first part the author argues that there are problems with materialism and that self transformation could lead individual scientists to more comprehensive ways of understanding reality In the second part he takes on the contentious notion of inner knowledge and shows how access to inner knowledge could be possible in some altered states of consciousness The third part is an analysis of the philosophy of Franklin Wolff who claimed that the transcendent states of consciousness which occurred for him resulted from his mathematical approach to spirituality *The Science of Spirit* Luis Portela, 2020-12-25 Throughout the 20th century and into the new millennium humanity has made enormous advancements in science and technology Spiritual enlightenment however has gone relatively neglected as fascination with material progress tends to keep us focused on the physical world giving less importance to universal values to being to spiritual life Parapsychological research has produced significant findings over the last few decades and science has the obligation to continue exploring this area seeking to contribute to the spiritual enlightenment of humanity This book examines evidence of traditional psychic phenomena promoting a more comprehensive understanding of them and offering new perspective to see ourselves as particles of universal energy interconnected with all others *Rebirth in Early Buddhism and Current Research* Bhikkhu Analayo, 2018-04-23 Join a rigorous scholar and Buddhist monk on a brisk tour of rebirth from ancient doctrine to contemporary debates German Buddhist monk and university professor Bhikkhu Analayo had not given much attention to the topic of rebirth before some friends asked him to explore the treatment of the issue in early Buddhist texts This succinct volume presents his findings approaching the topic from four directions The first chapter examines the doctrine of rebirth as it is presented in the earliest Buddhist sources and the way it relates to core doctrinal principles The second chapter reviews debates about rebirth throughout Buddhist history and up to modern times noting the role of confirmation bias in evaluation of evidence Chapter 3 reviews the merits of current research on rebirth including near death experience past life regression and children who recall previous lives The chapter concludes with an examination of xenoglossy the ability to speak languages one has not learned previously and chapter 4 examines the particular case of Dhammaruwan a Sri Lankan boy who chants Pali texts that he does not appear to have learned in his present life *Rebirth in Early Buddhism and Current Research*

brings together the many strands of the debate on rebirth in one place making it both comprehensive and compact It is not a polemic but an interrogation of the evidence and it leaves readers to come to their own conclusions **Echoes of the Soul:**

Castro-Borrego,2011-05-25 This volume has as a cohesive argument the exploration of the different manifestations of the search for wholeness and spirituality in the writings of contemporary African American women writers covering different literary genres such as fiction both novels and short stories drama and poetry Together with the issue of spirituality the African American search for wholeness is analyzed as a source of creativity and agency As expressed in the contemporary literature of black women writers starting in the 1980s the search for wholeness reflects a beauty realized through the healing of the spirit and the body and is a process that takes on dimensions of reconciling the past and the present the mythical and the real the spiritual and the physical all in the context of an emerging world view that welcomes synthesis and expects both synthesis and generative contradictions The book will be a valuable collection for scholars of African American literature comparative American Ethnic literature American literature and spirituality as well as women s studies In addition it will be an important text for both undergraduate and graduate students in those fields As Professor Johnnella Butler 2006 points out the African American search for wholeness is tightly linked to the search for freedom and agency Ever since the 19th century African American writers have given expression to an African American self which functions in Western civilization simultaneously as a colonized other and an assertive self Due to the continuous ordeal of the African Diaspora this self is caught in between the binaries proposed by the material and the spiritual world seeking a balance where the person can become whole The search for wholeness feeds from cultural roots that imply the presence of ancestral spiritualism rememory and double consciousness Contemporary black women writers reflect the metaphor of building spiritual bridges seeking the possibilities of building a bridge to the archetypal African past that is carried in their memories as a presence that offers sustenance via spiritual reconnection Their works seek to bridge the gap between the myths and traditions of the past and contemporary African American culture The texts included in this collection are examples of writing as an exercise of what V v Clark calls Diaspora literacy The texts written by contemporary African American women writers explicitly show how to recognize and read the cultural signs left scattered along the road of progress In this way material acquisition is achieved along with cultural dispossession becoming a metaphor for the history of the African in America The powerful message is that one should not exclude the other
