Sound Of Music Thelate Intermediate:

Music as Concept and Practice in the Late Middle Ages Reinhard Strohm, Bonnie J. Blackburn, 2001 Music as Concept and Practice in the Late Middle Ages is an entirely new addition to the New Oxford History of Music series rather than a revision of the volume's predecessor published in 1960. It takes account not only of the developments in late medieval music scholarship during the latter decades of the twentieth century but also of the experience gained through significant changes in the performance practice of the late medieval repertory witnessed during this period. All the chapters include areas of discussion whose coverage in the series hitherto has been either wholly lacking or at best marginal. Muslim and Jewish musical traditions of the Middle Ages, late medieval office chant, medieval dance music, musical instruments in society, music in Central and Eastern Europe, music theory of the fourteenth and fifteenth centuries, music and early Renaissance humanism. The first chapter and the last three present the conceptualization of music in speculative theory, philosophy, compositional and didactic practice, and musical historiography. Four chapters and part of the first illustrate important musical repertoires and genres as they were developed within diverse societies. The eight authors, all of them with a long standing interest in their respective subjects, have created through their collaboration a blend of mature scholarship and original investigation. The volume's novelty of approach and content is complemented by a firm anchorage in the specialist literature and documentary source material. Today no single view of the Middle Ages can be acceptable to the musician or to the historian. The present volume, which addresses itself to both, provides solid information on formerly marginal themes and advocates further exploration of the other Middle Ages.

German Instrumental Music of the Late Middle Ages Keith Polk, 2004 This book describes instrumental music and its context in German society of the late middle ages from about 1350 to 1520. Players at that time improvised much like jazz musicians of our day but because they did not use notated music, only scant remnants of their activity have survived in written sources and much has been left obscure. This book attempts to reconstruct an image of their music, discussing the instruments, ensembles, and performance practices of the time. What emerges from this study is a fundamental reappraisal of late medieval culture. A musical life is reconstructed which was not only extraordinary in its own time but which also laid the foundations of an artistic culture that later produced such giants as Sch tz, Bach, Mozart, and Beethoven.

Music in the Late Twentieth Century Richard Taruskin, 2006-08-14 The universally acclaimed and award winning Oxford History of Western Music is the eminent musicologist Richard Taruskin's provocative, erudite telling of the story of Western music from its earliest days to the present. Each book in this superlative five volume set illuminates through a representative sampling of masterworks the themes, styles, and currents that give shape and direction to a significant period in the history of Western music. Music in the Late Twentieth Century is the final installment of the set, covering the years from the end of World War II to the present. In these pages Taruskin illuminates the great compositions of recent times, offering insightful analyses of works by Aaron Copland, John Cage, Milton Babbitt, Benjamin Britten, Steve Reich, and Philip

Glass among many others He also looks at the impact of electronic music and computers the rise of pop music and rock n roll the advent of postmodernism and the contemporary music of Laurie Anderson John Zorn and John Adams Laced with brilliant observations memorable musical analysis and a panoramic sense of the interactions between history culture politics art literature religion and music this book will be essential reading for anyone who wishes to understand this rich and diverse period

The ^AMotet in the Late Middle Ages Margaret Bent,2023-11-03 A wide ranging single authored overview of late medieval motets by a leading scholar The Motet in the Late Middle Ages offers innovative approaches to the equal partnership of music and texts in motets of the fourteenth century and beyond With new analyses of text and music together new datings new attributions and new hypotheses about origins and interrelationships author Margaret Bent uncovers little explored dimensions provides a window into the craft and thought processes of medieval composers and opens up many directions for future work

Martianus Capella in the Late Middle Ages and Renaissance Katie Reid,2023-10-09 In this book Katie Reid argues that the fifth century author Martianus Capella was a significant influence in the late Middle Ages and Renaissance His poetic encyclopaedia The Marriage of Philology and Mercury was a source for writing on the liberal arts allegory and classical mythology from 1300 to 1650 In fact writers of this period had much more in common with Martianus Capella than they did with older ancients like Homer and Virgil As such we must reshape our understanding of late medieval and Renaissance encounters with the classical world by exploring their roots in Late Antiquity
