The Presidency and the Rhetoric of Foreign Crisis Denise M. Bostdorff, 1994 *The Presidency and the Rhetoric of Foreign Crisis* examines presidential crisis management or the way U S presidents portray foreign crises

to the American public as a potent tool for the accumulation and at times the forfeiture of political power Arguing that it is largely through presidential communication that foreign crises become real for American citizens Bostdorff does not claim that presidents fabricate crises but rather that they vigorously advance their version of the crisis to the American public in order to rally support for their foreign policies Bostdorff contends that presidential language can heighten the significance of events that otherwise would attract little public attention such as a coup on the tiny Caribbean island of Grenada and thereby persuade citizens to support U S military intervention and to view the commander in chief as a decisive victorious leader To prove her assertions Bostdorff presents case studies from six successive administrations Beginning with Kennedy and the Cuban missile crisis of 1962 she examines Johnson and the Gulf of Tonkin Nixon and Cambodia Ford and the Mayaguez Carter and Iran and Reagan and Grenada Concluding with an evaluation of Bush and Panama Bostdorff identifies the recurring themes that defined crisis rhetoric explains how that rhetoric encourages particular public reactions and raises disturbing questions about the implications for the American polity

stars our athletes and our politicians carefully craft images for public consumption Even our country s Executive Chief is not immune to a bit of image manipulation If presidents can not always actually satisfy the public s excessive contradictory and unrealistic expectations they can at least present a compelling image of presidential leadership and success When it comes to the modern presidency tennis star Andre Agassi was correct Image is everything Image creation is a serious business with critically important implications for the success of any politician But presidents must be careful in deciding how they craft the ways in which we perceive them If they are to succeed presidents must present an appropriate image of leadership to the American people an image that is appropriate for the particular needs of the time when the president governs and is appropriate to the personality of that president Their ultimate goal is to convince the public that they are actually providing leadership even if in reality they have only a limited ability to effect outcomes This book examines the way American presidents in the media age have shaped their public personas as a means of cultivating and advancing their political and ideological agendas Images play an important role in the perceived success or failure of our presidents Since public expectations are most often aimed directly at the White House and its central occupant it is more important than ever that a president control his image as well as presenting the right image to the American public Reality thus becomes secondary and image is everything
