**Symbolism, Cognition and Communication in Architecture** Abraham George, 2024-06-28 This book discusses the role and significance of symbols and symbolism in graphical communication toward the establishment of meaningful architecture. It explores how these are effectively applied in architectural education for the empowerment of learners in various cultures around the world. The volume examines the developments in graphic representations while recognizing the importance of cognition and its perception in spatial terms. In a scenario where architectural education is at crossroads facing challenges of a global nature, this book highlights the importance of understanding architectural curriculum and design subjects. The author discusses the issues of communicating the knowledge of architecture to heterogeneous groups of students and explains how design fields and learning in architecture can be modified through cognitive instructional methods. The book outlines the methodology to develop symbols and symbolic pedagogical tools for effective communication in architecture. The book will appeal to students, researchers, teachers, and scholars of architecture, design, planning, and visual communication. It will also be of interest to architects, artists, spatial designers, town planners, urban planners, and professionals.

**A Brief Systematic Theology of the Symbol** Joshua Mobley, 2021-11-18 How do Christians understand the Trinity? How does this understanding relate to other Christian teachings? In conversation with key thinkers in contemporary and classical theology, particularly Henri de Lubac, Karl Rahner, Thomas Aquinas, and Augustine, this book argues that a theology of symbols can help us glimpse the mystery of the Trinity and see how this central Christian teaching corresponds to Christian understandings of creation, humanity, and the church. A symbol is not here understood as an arbitrary sign but as a sign that mediates the presence of the symbolized. Joshua Mobley examines the understanding of the Father as symbolized in the Son, who is the symbol of the Father by the symbolism of the Spirit, the personal agent of unity between Father and Son. These trinitarian relations then structure creaturely relations to God. God is symbolized in creation, which is a symbol of God by participation in the Son, and the church is symbolism, the union of creation with God by the power of the Spirit. Mobley thus argues that a theology of symbol helps coordinate trinitarian theology with key themes in Christian dogmatics.

**Symbolism and Astrology: An Introduction to Esoteric Astrology** Alan Leo, 2005-12-01 To the uninitiated, the science or art of Astrology appears complicated, and its study too intricate to be followed or understood easily. This notion, however, is erroneous and is mainly caused by confusion of thought and the misconceptions which bias or prejudice has introduced into the subject. From Chapter 1, **The Simplicity of Astrology**. Some consider him the father of modern astrology for in the early 20th century prominent British astrology Alan Leo opened up the secrets of divination by the stars to the general public with his line of Modern Astrology manuals, a popular series of books that set off a craze for horoscopes that continues to this day. In this 1914 guide, Leo explains in easy-to-understand language the basic symbology that underlies the reading of the zodiac, the many aspects of the circle that can represent the solar system, the sun, and the moon, the cross expressing the

creative power of life and the physical body the basic signs that signify each of the houses of the zodiac and each of the planets and what they metaphorically denote and more This is an invaluable resource for modern astrology buffs and those interested in the history of the paranormal British astrologer WILLIAM FREDERICK ALLAN 1860 1917 a.k.a.
