Flags, Color, and the Legal Narrative Anne Wagner,Sarah Marusek,2021-05-24 On behalf of Professor Hugh Brady Director and Senior Fellow The Flag Research Center at the University of Texas School of Law Flags Color and the Legal Narrative Public Memory Identity and Critique Springer 2021 has been selected as the recipient of our Gherardi Davis Prize is presented for a significant contribution to vexillological research for the year 2021 This work was selected because of its breadth and depth in examining flags as meaningful transmitters of significant symbolic information concerning the origins culture self image and values of a society We believe it represents a signal achievement in the study of flags that sets a new standard for research in the field The Flag Research

Center founded in 1962 is dedicated to furthering knowledge and advancing understanding of the human need to create and use symbols to express political cultural and social ideals through flags and flag related material culture The book deals with the identification of identity based on culturally specific color codes and images that conceal assumptions about members of a people comprising a nation or a people within a nation Flags narrate constructions of belonging that become tethered to negotiations for power and resistance over time and throughout a people s history Bennet 2005 defines identity as the imagined sameness of a person or social group at all times and in all circumstances While such likeness may be imagined or even perpetuated the idea of sameness may be socially politically culturally and historically contested to reveal competing pasts and presents Visually evocative and ideologically representative flags are recognized symbols fusing color with meaning that prescribe a story of unity Yet through semiotic confrontation there may be different paths leading to different truths and applications of significance Knowing this and their function the book investigates these transmitted values over time and space Indeed flags may have evolved in key historical periods but contemporaneously transpire in a variety of ways The book investigates these transmitted values Which values are being transmitted Have their colors evolved through space and time Is there a shift in cultural and or collective meaning from one space to another What are their sources What is the relationship between law and flags in their visual representations What is the shared collective and or cultural memory beyond this visual representation Considering the complexity and diversity in the building of a common memory with flags the book interrogates the complex color coded sign system of particular flags and their meanings attentive to a complex configuration of historical social and cultural conditions that shift over time Advance Praise for *Flags Color and the Legal Narrative* In an epoch of fragmentation isolation and resurgent nationalism the flag is waved but often forgotten The flag its colors narratives shape and denotations go without saying The red flag over China the Star Spangled Banner the Tricolore are instantly recognisable and over determined representing a people a nation a culture languages legacies leaders In this fabulous volume flags are revealed as concentrated complex chromatic assemblages of people place and power in and through time It is in bringing a multifocal awareness of the modes and meanings of flag and color in public representations that is particular strength Editors Anne Wagner and Sarah Marusek have gathered critical thinkers from the North and South East and West to help know the essential and central yet often forgotten and not seen work of flags and color in narratives of nation conflict struggle and law A kaleidoscopic contribution to the burgeoning field of visual jurisprudence this volume is essential to comprehending the ocular machinery through which power makes and is seen to make the world Kieran Tranter Chair of Law Technology and Future Faculty of Law Queensland University of Technology Australia This comprehensive volume of essays could not be arriving at a more opportune time The combined forces of climate change inequality and pandemic are causing instability and painful recognitions of our collective uncertainties about nationhood and globalism In the United States where I am writing these few lines our traditional red white blue flag has been collapsed into

two colors Red and Blue While these colors have semiotically deep texts the division of the country into these two colors began with television stations designing how to report the vote count in the 2000 presidential election year creating red and blue parties and states The colors stuck and have become customary We Americans are told all the time by pundits that we are a deeply divided nation as proven by unsubtle colored maps To a statistician we are a Purple America though the color is unequally distributed White the color of negotiation and peace is rarely to be found To begin to approach understanding the problems flagged in my brief account requires the insight of multiple disciplines That is what Wagner and Marusek wonderful scholars in their own work have assembled as editors a conversation among scholars at the forefront of thinking about how flags and colors represent those who claim them thus exemplifying how to resist simple explanations and pat answers The topic is just too important Christina Spiesel Senior Research Scholar in Law Yale Law School Adjunct Professor of Law Quinnipiac University School of Law USA Visuals such as symbols and images in addition to conventional textual forms seem to have a unique potential for the study of a collective identity of a community and its traditions as well as its narratives and at the same time in the expression of one's ideas impressions and ideologies in a specific socio political space Visual analysis thus has become a well established domain of investigations focusing on how various forms of text external semiotic resources such as culturally specific symbols including patterns and colors make it possible for scholars to account for and thus demystify discursive symbols in a wider social and public space Flags Identity Memory Critiquing the Public Narrative through Colors as an international and interdisciplinary volume is a unique attempt to demystify the thinking values assumptions and ideologies of specific nations and their communities by analyzing their choice of specific patterns and colors represented in a national flag It offers a comprehensive and insightful range of studies of visual and hidden discursive processes to understand social narratives through patterns of colours in the choice of national flags and in turn to understand their semiotic philosophical and legal cultures and traditions Wagner and Marusek provide an exclusive opportunity to reflect on the functions roles and limits of visual and discursive representations This volume will be a uniquely resourceful addition to the study of semiotics of colours and flags in particular how nations and communities represent their relationship between ideology and pragmatism in the repository of identity knowledge and history Vijay K Bhatia Chinese University of Hong Kong Full Professor Hong Kong In all societies colors play a critical function in the realm of symbolism Nation societies perceive great significance in the colors of flags and national emblems Colors constitute in other words sign systems of national identity The relation of color codes and their relation to concepts of nationhood and its related narratives is the theme of this marvelous and eye opening collection of studies Flags are mini texts on the inherent values and core concepts that a nation espouses and for this reason the colors that they bear can be read at many levels from the purely representational to the inherently cultural Written by experts in various fields this interdisciplinary anthology will be of interest to anyone in the humanities social sciences jurisprudence narratology political science and semiotics It will show

how a seemingly decorative aspect of nationhood the colors on flags tells a much deeper story about the human condition
