Inter/Cultural Communication Anastacia Kurylo, 2012-07-23 Today students are

more familiar with other cultures than ever before because of the media Internet local diversity and their own travels abroad As such traditional intercultural communication textbooks which focus solely on the differences approach aren't truly effective for today's students nor for this field's growth Using a social constructionist framework which explores how culture is constructed and produced in the moments in which it is experienced Inter Cultural Communication provides today's students with a rich understanding of how culture and communication affect and effect each other Inter Cultural Communication improves upon current textbooks in four significant ways 1 It provides a differences approach and a social constructionist approach 2 It explores the consequences of cultural moments on immediate communication and on larger scale social issues 3 It is descriptive not prescriptive of how culture is communicated and 4 It introduces intercultural topics rather than interpersonal topics Weaving multiple approaches together in order to provide students with a comprehensive understanding of and appreciation for the diversity of cultural and intercultural communication this text allows them to become more aware of their own identities and how powerful those identities can be in facilitating change both in their own lives and in the lives of others In addition the book will help students deal with unfamiliar cultures and understand those with whom they come in contact when they travel in their communities in the workplace in their home and online

volume as thus planned was prohibitive and it was decided to change the plan somewhat. The synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume. The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment. Throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory following directly upon the introductory course in sociology in departments of sociology. If the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology, economics, politics, and more advanced courses in history and literature in those departments which care to use it in this way. That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted. While the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published.
