ViolinMind Hans Jørgen Jensen, Minna Rose Chung, Grigory Kalinovsky, 2019-09-12 ViolinMind is a pedagogical method book that focuses on intonation. It is a transcription for the violin of CelloMind published in 2017 by Ovation Press Ltd. The co-authors of ViolinMind are Hans Jørgen Jensen, Professor of Cello at the Bienen School of Music at Northwestern University, and Grigory Kalinovsky, Professor of Music Violin at Indiana University Jacobs School of Music. The mystery of intonation is dissected by defining the scientific principles behind it and providing easy, intuitive examples of the three main kinds of intonation systems used today: Equal Temperament, Just, and Pythagorean. Playing with exquisite intonation has mostly been reserved for those who possess a strong intuitive sense of pitch and harmonic color; however, ViolinMind breaks down this barrier using a highly detailed, systematic approach, making the process of acquiring a sophisticated sense of intonation similar to any other technical skill. Chapters in the book explore in great detail topics such as the harmonic overtone series, the scientific principles behind Cents, the syntonic comma, the just scales, the Pythagorean comma, the Pythagorean semitones, advanced sympathetic vibrations, Tartini tones, and double stops studies in tritones. All chapters in the book include numerous practical samples and listening exercises that bridge the gap between the theory and its application. The chapters on intonation conclude with practical examples from the following repertoire: intonation performance practice in the Bach Sonatas and Partitas for Violin Solo BWV 1001, 1006, and intonation performance practice with piano. The appendices in the book provide detailed explanations about the Helmholtz intonation chart, the harmonic series, just intonation, the Schisma, as well as an illustration of two violin fingerboards from two method books from the 18th century showing pitch distribution for just intonation and Pythagorean intonation, respectively.

CelloMind is a two-part pedagogical method book that focuses on intonation and left-hand cello technique. The coauthors of the book are Hans Jørgen Jensen, Professor of Cello at the Bienen School of Music at Northwestern University, and Minna Rose Chung, Associate Professor of Cello at the Desautels Faculty of Music at the University of Manitoba. Part I: Intonation. The mystery of intonation is revealed by defining and explaining the scientific principles that govern it. To know and understand how to combine the three primary intonation systems has never before been expounded in a methodology publication, and for good reason. Playing with exquisite intonation has mostly been reserved for those who possess a strong intuitive sense; however, CelloMind breaks down this taboo using a systematic approach with a highly attuned manner. The three systems of intonation that string players most commonly use today—equal temperament, just intonation, and Pythagorean tuning—are each explored and explained in great detail. All chapters in the book include many practical samples and listening exercises that bridge the gap between the theory and its application. The chapters on intonation conclude with practical examples from the following repertoire: Intonation Performance Practice in the Bach Solo Cello Suites and Intonation Performance Practice with

Piano Part II Left Hand Technique The left hand technique chapters in this section complement the study of intonation by providing a solid foundation of skills for essential cello playing The topics and exercises have been selected to cover a wide range of technical skills that include playing with a light left hand touch speed coordination balanced vibrato agility finger independence and efficient shifting Original exercises developed for students over many years have also been incorporated into these chapters as well as studies from Julius Klengel Bernhard Cossmann Louis R Feuillard Jean Louis Duport Yakov Rosenthal and Fritz Albert Christian Rudinger *The American Journal of Science* ,1911 **Vibratory Modernism** A.
