Synergy Eric Dion CD MBA PhD,2017-12-12 The comprehensive approach has been a new emerging phenomenon within the field of strategic studies national security and international defence Former NATO secretary general Rasmussen posited that this approach not only makes sense it is necessary Yet with the rise of asymmetric warfare and the emergence of new constructs the comprehensive approach is not supported by a necessary framework model or theory Indeed if the military alone is unable to solve the root cause of conflicts then other elements of national and international power must collaborate more closely In Synergy A Theoretical Model of Canada s Comprehensive Approach author senior lecturer and strategic management consultant Eric Dion proposes a theoretical model for this new approach How can such an integrated decision making model be constructed for the comprehensive approach Where and when who and with whom what how why and to what effect can such a model be employed Synergy answers these questions with an integrated theoretical model constructed of six management dimensions the situational context the sociocultural the organisational structure the strategic policies the systemic processes and the synergy dynamics Together these six dimensions fundamentally represent what would be the basic constructs for a more integrated theoretical model of the comprehensive approach Taking a strategic management perspective on the comprehensive approach can open new

perspectives within the field of national security and defence a field traditionally dominated by political science and international relations In the end synergy appears to better explain the complex dynamics at play within the comprehensive approach
