argument structure as opposed to minimalistic proposals of a binary template model for argument structure in order to optimally account for various syntactic and semantic facts as well as data derived from wider cross linguistic perspectives

Syntax - Theory and Analysis. Volume 1 Tibor Kiss,Artemis Alexiadou,2015-02-17 This Handbook represents the development of research and the current level of knowledge in the fields of syntactic theory and syntax analysis Syntax can look back to a long tradition Especially in the last 50 years however the interaction between syntactic theory and syntactic analysis has led to a rapid increase in analyses and theoretical suggestions This second edition of the Handbook on Syntax adopts a unifying perspective and therefore does not place the division of syntactic theory into several schools to the fore but the increase in knowledge resulting from the fruitful argumentations between syntactic analysis and syntactic theory It uses selected phenomena of individual languages and their cross linguistic realizations to explain what syntactic analyses can do and at the same time to show in what respects syntactic theories differ from each other It investigates how syntax is related to neighbouring disciplines and investigate the role of the interfaces especially the relationship between syntax and phonology morphology compositional semantics pragmatics and the lexicon The phenomena chosen bring together renowned experts in syntax and represent the consensus reached as to what has to be considered as an important as well as illustrative syntactic phenomenon The phenomena discuss do not only serve to show syntactic analyses but also to compare theoretical approaches with each other   Instruments and Related Concepts at the Syntax-Semantics Interface Koen Van Hooste,2018-04-30 This series Dissertations in Language and Cognition explores issues of mental representation linguistic structure and representation and their interplay The research presented in this series is grounded in the idea explored in the Collaborative Research Center The structure of representations in language cognition and science SFB 991 that there is a universal format for the representation of linguistic and cognitive concepts   **Parts of Speech** Umberto Ansaldo,Jan Don,Roland Pfau,2010-09-15 Parts of Speech are a central aspect of linguistic theory and analysis Though a long established tradition in Western linguistics and philosophy has assumed the validity of Parts of Speech in the study of language there are still many questions left unanswered For example should Parts of Speech be treated as descriptive tools or are they to be considered universal constructs Is it possible to come up with cross linguistically valid formal categories or are categories of language structure ultimately language specific Should they be defined semantically syntactically or otherwise Do non Indo European languages reveal novel aspects of categorical assignment This volume attempts to answer these and other fundamental questions for linguistic theory and its methodology by offering a range of contributions that spans diverse theoretical persuasions and contributes to our understanding of Parts of Speech with analyses of new data sets These articles were originally published in Studies in Language 32 3 2008   Grammar from the Human Perspective Marja-Liisa Helasvuo,Lyle Campbell,2006-10-19 The papers of this volume investigate how grammar codes the subjective viewpoint of human language users that is how grammar reflects human conceptualization Some of the articles deal with spatial relations

and locations They discuss how basic attributes of human conceptualization are encoded in the grammatical expression of spatial relations Other articles concern embodiment in language showing how conceptualization is mediated by one s embodied experience of the world and ourselves Finally some of the articles discuss coding of person focusing on the subjec tivity of conceptualization and how it is reflected in grammar The articles show that conceptualization reflects the speaker s construal of the situation and furthermore that it is intersubjective because it reflects the speaker s understanding of the relations between the speech act participants The papers deal with Finnish utilizing the rich resources of Finnish grammar to contribute to issues in contemporary linguistics and in particular to Cognitive Grammar *Syntactic and Semantic Variation in Copular Sentences* Daniel J. Wilson,2020-07-16 This book presents a novel account of syntactic and semantic variation in copular and existential sentences in Classical Hebrew Like many languages the system of Classical Hebrew copular sentences is quite complex containing zero pronominal and verbal forms as well as eventive and inchoative semantics Approaching this subject from the framework of Distributed Morphology provides an elegant and comprehensive explanation for both the syntactic and semantic variation in these sentences This book also presents a theoretical model for analyzing copular sentences in other languages included related phenomena such as pseudo copulas It is also a demonstration of what can be gained by applying modern linguistic analyses to dead languages Citing and building off previous studies on this topic this book will be of interest to those interested in the theoretical examination of copular and existential sentences and to those interested in Classical Hebrew more specifically **Mouton Classics** ,2013-08-26 Mouton proudly presents this collection of articles considered to be representative of author achievements over the past quarter century of its publishing history A selection of course can do little more than make the readers wish for more it is hoped that these volumes will do just that The book contains essays on Phonology Morphology Formal Syntax Functional Linguistics Historical Linguistics Language and Cognition Language Acquisition Discourse and Text Sociology of Language Semiotics **Historical Linguistics, 1993** Henning Andersen,1995-01-01 This volume contains a selection of 34 of the 96 papers presented at ICHL 1993 including several of the contributions to the workshop on Parameters and Typology organized jointly by Henning Andersen and David W Lightfoot Major topics represented are grammaticalization and functional renewal illustrated with changes in romance French Pennsylvania German Afrikaans English Finnish changes in syntax Indo European Indo Aryan Ancient Greek Romanian Spanish Portuguese French Japanese Dutch English and discourse structure Old Russian Old French morphology German Turkic phonology Romance Italian French German Old English English Several papers include sociolinguistic areal and typological perspectives on change a few are specifically concerned with reconstruction or with the principles of reconstruction and several demonstrate the continued importance of the philological methods in the study of texts *Contrastive Studies in Construction Grammar* Hans C. Boas,2010-11-11 The papers in this volume provide a contrastive application of Construction Grammar By referencing a well described constructional phenomenon in English each

paper provides a solid foundation for describing and analyzing its constructional counterpart in another language This approach shows that the semantic description including discourse pragmatic and functional factors of an English construction can be regarded as a first step towards a tertium comparationis that can be employed for comparing and contrasting the formal properties of constructional counterparts in other languages Thus the meaning pole of constructions should be regarded as the primary basis for comparisons of constructions across languages the form pole is only secondary This volume shows that constructions are viable descriptive and analytical tools for cross linguistic comparisons that make it possible to capture both language specific idiosyncratic properties as well as cross linguistic generalizations   200 Years of Syntax Giorgio Graffi,2001 This book argues convincingly against the widespread opinion that very few syntactic studies were carried out before the 1950s Relying on the detailed analysis of a large amount of original sources it shows that syntactic matters were in fact carefully investigated throughout both the 19th century and during the first half of the 20th century Moreover it illustrates how the enormous development of syntactic research in the last fifty years has already condemned even several recent ideas and analyses to oblivion and deeply influenced current research programs The wealth of research undertaken over the last two centuries is presented here in a systematic way taking as its starting point the relationship of syntax with psychology throughout this period The critical ideas expressed in the text are based on a detailed illustration of the different syntactic models and analyses rather than on the polemics between the different schools

Construction Grammar across Borders Tiago Timponi Torrent,Ely Edison da Silva Matos,Natália Sathler Sigiliano,2022-07-15 Since its foundation in the 1980 s Construction Grammar has been crossing the traditionally imposed borders From superimposed levels of analysis to the lexicon grammar continuum the constructionist approach to language has been built by quoting Charles Fillmore the insistence on seeing specific grammatical patterns as serving given semantic and often pragmatic purposes and in the effort to construct a uniform theory capable of presenting both the simplest and most general aspects of language and the large world of complex grammatical structures In this volume five chapters derived from the plenary talks at the 9th International Conference on Construction Grammar provide a sample of the bridges the insistence and effort of construction grammarians have built in the past three decades with other analytical models namely Cognitive Grammar and Collostructional Analysis perspectives Diachronic Construction Grammar and applications Language Pedagogy and Natural Language Understanding Originally published as special issue of Constructions and Frames 12 1 2020
