This book begins with a thought provoking article now reprinted criticising the increasing influence of politically correct  
organisations and politicians who desire to control freewill and mountaineering Then comes a chapter with a critique of  
several writers on the Cairngorms in comparison with the original Seton Gordon After the author published a review in 1977  
on The wildlife potential of the Cairngorms region he came under unwarranted attack by two influential private landowners  
who misrepresented what he wrote and even included a threat A wider public should be aware of this There follows an essay  
on biologist Professor Vero C Wynne Edwards and another on the history of the research station near Banchory established  
for studying at first red grouse and then ecological problems of mountain moorland woodland and fresh water The last  
chapter the most important one and occupying a third of the book gives the author s lifetime view of the value of lone trips in

largest part describes the area s rich diversity of nature with each chapter summarising recent research findings trends and  
conservation issues for a different landform habitat or species group The second part considers deer management recreation  
and projected climate change impacts Part three focuses on rare and threatened species and identifies areas and habitats
