useful lecturer Dryden's Handbook of Individual Therapy is now a classic text for trainees in counselling and psychotherapy. This newly updated fifth edition presents a comprehensive overview of the key approaches to individual therapy practice including three new chapters on narrative therapy, solution focused therapy and integrative and eclectic approaches. Written by experts in their own therapeutic fields, the book introduces the principles and methods of individual therapy concisely and accessibly. Following a clearly defined structure, each chapter outlines one approach in detail and provides case examples to illustrate how that approach works in practice. Each form of therapy is described in terms of its historical context, the main theoretical assumptions, the mode of practice, which clients will benefit most, the general strengths and limitations of the approach. Further chapters place counselling and psychotherapy in their social context, explore training and supervision and relate research to individual therapy practice. Dryden's Handbook of Individual Therapy Fifth Edition is designed for those in training in counselling, psychotherapy, counselling psychology and other helping professions such as nursing, social work and education. It will be invaluable for novice therapists looking for an overall picture of individual therapy practice as well as for experienced therapists interested in learning about alternative approaches. Windy Dryden currently works at Goldsmiths College where he is Professor of Psychotherapeutic Studies as well as being the programme co-ordinator of the MSc in Rational Emotive Cognitive Behaviour Therapy and the Diploma in Cognitive Behaviour Therapy.

Mind, Body, Soul and Spirit in Transactional Analysis Gordon Law, 2006. Relationships may be understood as the contact that emerges from observable social roles underpinned by inter-personal attitudes. Using transactional analysis and other approaches, this book presents a series of models based on an analysis of the relationships that are created when contact between people links images and roles to confirm existential life positions. Because the models provide a meta-level framework for understanding and influencing any sequence of interaction irrespective of setting or TA specialism, they give ample scope for practitioners to exercise widely differing preferences, techniques and strategies for interacting with clients in ways that encompass a transpersonal or a spiritual view of relationships.
