How Babies Talk Roberta Michnick Golinkoff, Kathy Hirsh-Pasek, 2000-07-01 In their first three years of life babies face the most complex learning endeavor they will ever undertake as human beings They learn to talk Now as researchers make new forays into the mystery of the development of the human brain Golinkoff and Hirsh-Pasek both developmental psychologists and language experts offer parents a powerfully insightful guidebook to how infants even while in the womb begin to learn language Along the way the authors provide parents with the latest scientific findings developmental milestones and important advice on how to create the most effective learning environments for their children This book takes readers on a fascinating vitally important exploration of the dance between nature and nurture and explains how parents can help their children learn more successfully *Making Babies* Sandra Sabatini, 2006-01-01 Although the infant has been a consistent figure in literature and for many people a significant figure in personal life there s been little attention focused on infants or on their place in Canadian fiction until now In this book Sandra Sabatini examines Canadian fiction to trace the ideological charge behind the represented infant Examining writers from L M Montgomery and Frederick Philip Grove to Thomas King and Terry Griggs Sabatini compares women s writing about babies with the way infants appear in texts by men over the course of a century She discovers a range of changing attitudes toward babies After being seen as a source of financial burden social shame or sentimental fantasy infants have increasingly become a source of value and meaning The book challenges the perception of babies as passive objects of care and argues for a reading of the infant as a subject in itself It also reflects upon how the representations of infancy in Canadian literature offer an intriguing portrait of how we imagine ourselves
