Smoking Health Personality With A New Foreword By Stuart Brody:

Smoking, Health and Personality Hans Eysenck, 2018-04-27 The Report on Smoking and Health published by the Royal College of Physicians in England in 1965 warned of a connection between lung cancer and smoking The findings were widely publicized and were accepted by practically every one indeed they persist today As Hans J Eysenck shows in his classic study *Smoking Health and Personality* the results were by no means immune to challenge Not only were the experimental and statistical methods employed vulnerable to criticism but the results were open to more than one interpretation In this new edition Stuart Brody reviews Eysenck's achievement Eysenck critically reviewed the literature presented longitudinal studies showing that psychological characteristics are far more potent predictors of heart disease and cancer than smoking behavior and demonstrated that psychological treatment can halve death rates Eysenck also spoke the unspeakable iconoclastically attacking the cherished attribution of millions of deaths to smoking He examined the interaction of smoking with personality and constitutional factors and the connection between these factors and the development of cancer Eysenck saw the cause and effect relation between cancer and smoking as oversimplification He also makes a number of practical suggestions for the kind of social action that could be taken to decrease the incidence of lung cancer For his part Brody notes that massive campaigns which exhort people to eschew tobacco or cholesterol have had little or no demonstrable health benefits This original and stimulating volume is written with great clarity and is easily understood by the layman It is an incisive account of one of the most important social problems in this country today and a challenge to orthodoxy in the medical world As such this volume offers much for both sides of the anti smoking lobby as well as those in the fields of psychology political science and sociology

Bad Foods Michael E. Oakes, *Bad Foods* demonstrates how a variety of historical or political events and personalities have shaped our current views of good nutrition On several occasions in American history concerns have arisen over the safety of our food supply e g harmful ingredients in processed foods and the potential that processing might deplete foods of their nutrients These concerns help explain how food characteristics such as freshness natural organic and unprocessed have become important to Americans *Bad Foods* traces how the food nutrients fat salt and sugar have acquired negative reputations for health as well as any controversies and outright misconceptions of the dangers of these nutrients *Bad Foods* also explores confusion that can in part be attributed to biased media coverage about foods Modern Americans are routinely bombarded with information about the health value of certain foods and the dangers of others Frequently health information about certain nutrients receives exaggerated coverage e g dietary fat while the importance of other nutrients gets ignored e g vitamins and minerals Moreover health information about foods is often perceived as contradictory While some readers may be startled by what they perceive to be a challenge to sacred beliefs about foods others will see the honesty in both the research and the writing and recognize the social benefits of examining our beliefs about foods *Bad Foods* will be of interest to sociologists food science specialists and social historians

The Holy Sh!t Moment James Fell, 2019-01-22 Motivation expert James Fell teaches readers how to skip the hard part and go directly from intention to committed action After years of helping people change James Fell had a sudden insight about sudden insight significant life change doesn't often come from just putting one foot in front of the other carefully observing and altering habits slogging through baby steps toward new behavior Rather the research reveals that serious life turnaround usually happens in a moment with a flash of inspiration Epiphany arrives like a lightning strike rapidly shifting the recipient of such enlightenment onto a new path that creates a better life Motivational psychology has traditionally focused on slow and steady gradual improvement over time to reach a desired goal whether it's weight loss career change battling addiction or success in relationships We've been told since toddlerhood that the tortoise beats the hare But through compelling science and powerful stories James Fell shows us that the hare has the edge overwhelming desire can be awakened fast and furiously When you learn to become attuned to that sensation of sudden awakening a new path can be followed almost effortlessly because it feels like destiny Everyone has the ability to experience the lightning strike The Holy Sh!t Moment will teach you how to create a life changing epiphany and go directly from intention to action

Smoking, Health and Personality Hans Jurgen Eysenck, 2000-11-01 The Report on Smoking and Health published by the Royal College of Physicians in England in 1965 warned of a connection between lung cancer and smoking The findings were widely publicized and were accepted by practically every one indeed they persist today As Hans J Eysenck shows in his classic study Smoking Health and Personality the results were by no means immune to challenge Not only were the experimental and statistical methods employed vulnerable to criticism but the results were open to more than one interpretation In this new edition Stuart Brody reviews Eysenck's achievement Eysenck critically reviewed the literature presented longitudinal studies showing that psychological characteristics are far more potent predictors of heart disease and cancer than smoking behavior and demonstrated that psychological treatment can halve death rates Eysenck also spoke the unspeakable iconoclastically attacking the cherished attribution of millions of deaths to smoking He examined the interaction

of smoking with personality and constitutional factors and the connection between these factors and the development of cancer Eysenck saw the cause and effect relation between cancer and smoking as oversimplification He also makes a number of practical suggestions for the kind of social action that could be taken to decrease the incidence of lung cancer For his part Brody notes that massive campaigns which exhort people to eschew tobacco or cholesterol have had little or no demonstrable health benefits This original and stimulating volume is written with great clarity and is easily understood by the layman It is an incisive account of one of the most important social problems in this country today and a challenge to orthodoxy in the medical world As such this volume offers much for both sides of the anti smoking lobby as well as those in the fields of psychology political science and sociology Hans J Eysenck 1916 1997 wrote many books including the internationally acclaimed *Know Your Own IQ* and *The Uses and Abuses of Psychology* His works available from Transaction include *Intelligence* and new editions of *Rebel with a Cause* *The Psychology of Politics* and *Dimensions of Personality* Stuart Brody worked as a clinical psychologist in Germany as well as the United State He has been published in major U S and British medical journals and is author of *Sex at Risk* published by Transaction
