Songs To Birds:

The Songs of Birds ,2000-03 Drawn from oral traditions that stretch back to ancient times these stories and poems about birds from around the world both educate and fascinate Full color illustrations *The Music of Wild Birds* Judy Pelikan,F. Schuyler Mathews,2004-02-05 One hundred years ago F Schuyler Mathews an erudite naturalist and birder theorized that birds sing first for love of music and second for love of the lady To expand on his theory he actually scored the songs of birds in the wild His charming text and bird by bird annotations were compiled into a guide called *Field Book of Wild Birds and Their Music* This extraordinary work has now been lavishly illustrated and adapted for a new audience Each bird is meticulously rendered by artist Judy Pelikan in full color illustrations that feature not only the birds but also their nests eggs and feathers And every song is represented by its written musical score which Mathews expertly explains in a way that both musicians and non musicians can enjoy As Mathews points out the music of wild birds is everywhere in poems children s nursery songs as well as in the works of the great composers the Black billed Cuckoo s call appears near the close of Beethoven s Pastoral Symphony the Nashville Warbler s song is found in the opening bars of Rossini s Carovale and the Meadowlark s song is remarkably like the first two bars of Alfredo s song in La Traviata He reveals how a bird s character is reflected in its song the Baltimore Oriole is a sharp billed sharp witted character and his remarks are as incisive and crisp as the toots of a steam whistle And he reminds us of the words of our great poets Wordsworth Emerson Sir Walter Scott and their descriptions of the very same birds and their music This classic useful and completely original guide will put a song into the heart of novice and experienced birder alike **Field Book of Wild Birds and Their Music** Ferdinand Schuyler Mathews,1906 **Bird Song** Ernie Jardine,2011 No superficial re telling of a bird s song This is a thorough teaching oriented guide to learning bird song The author organizes the songs of over 200 birds according to a practical system which allows a birder to access and identify a mystery song often right in the field while the bird is singing More importantly each song is described in detail by its overall make up and quality and the nuances and progress of the notes within each is clearly explained as well as illustrated Songs are also defined and organized according to specific habitats as well as according to groupings with similar sounding deliveries Hundreds of original recordings available on the author s website complement and amplify what is being explained in each section of the book Alternate songs flight songs and calls are included as well as information on habitat nesting and summer and winter ranges This book will be welcomed by the birder and the non birder alike by anyone trying to learn and understand more about bird song **Bird Song** Clive K.
