Sonic Booms Resulting from Extremely Low-altitude Supersonic Flight: Measurements and Observations on Houses, Livestock and People C. W. Nixon, H. K. Hille, H. C. Sommer, Elizabeth Guild, 1968 Sonic booms generated by F 4C aircraft flying low level terrain following profiles during Joint Task Force II operations near Tonopah Nevada were recorded under and near the flight tracks and responses of structures animals and people were observed Recorded overpressures up to 144 psf were analyzed correlated with available aircraft operations data and compared with data from different aircraft flying similar profiles Observations of structures animals and people were correlated with the measured overpressures Results include acquisition of near field recordings of overpressures generated by the F 4C the finding that some window glass fragments were propelled a short distance rather than falling directly below the window an instance in which the measured overpressure of a sonic boom 1 mile to the side of the track far exceeded the predicted value the finding that livestock undetermined prior exposure to acoustic stimuli in this situation did not respond adversely to the sonic booms confirmation that very intense sonic booms do not harm people directly and the reaffirmation that the selection of site locations for low level supersonic training missions will continue to pose a problem **Sonic Boom Research** , 1969 SONIC BOOM RESEARCH AND DESIGN CONSIDERATIONS IN THE DEVELOPMENT OF A COMMERCIAL SUPERSONIC TRANSPORT (SST) , 1965 This paper presents a short history of sonic boom research and related operational considerations in the development of a commercial supersonic transport SST The most intensive public reaction research program to date was conducted at Oklahoma City Oklahoma An intensive research program to determine structural reaction to sonic booms was conducted at the White Sands Missile Range These two programs are discussed and a brief summary of the findings of the programs is presented The paper concludes that although much has been learned about the sonic boom phenomena through past flight and research activities additional research and theoretical studies are warranted Sonic-boom Research: Selected Bibliography with Annotation Harvey H.
