Spar, 1994 From these four cases she builds a picture of cooperation that departs significantly from the conventional portrayal and that has wide ramifications for our understanding of cooperation among states as well as among firms *Canadian Multinationals and International Finance* Gregory P. Marchildon, Duncan McDowall, 2013-12-02 Seven studies explore the modest but significant role of Canadian multinational enterprises in world finance trade and direct investment Presents a historical overview analyses of individual companies and considerations of whole industries *Shale Barrel Politics* Eric M. Uslaner, 1989 A Stanford University Press classic *Facing Reality* James M. replaced with new ones based on a new national consensus about economic goals reviews the ways business and government have worked together in the past to formulate economic strategies and suggests ways the government can create a new consensus and the prospects for its success in doing so Routledge Library Editions: Energy Various, 2021-07-09 Reissuing works originally published between 1964 and 1994 this set of ten volumes is an excellent collection of works on energy production and consumption economics and policy conservation and the crisis International in scope the volumes look at household energy conditions energy in the developing world political history and various other issues within the world of fuel and power This set is a resource for environment studies economics policy and politics sociology geography and other studies considering the use of energy in our world **Just Watch Me** John English, 2010-09-07 This magnificent second volume written with exclusive access to Trudeau's private papers and letters completes what the Globe and Mail called the most illuminating Trudeau portrait yet written sweeping us from sixties Trudeaumania to his final days when he debated his faith His life is one of Canada's most engrossing stories John English reveals how for Trudeau style was as important as substance and how the controversial public figure intertwined with the charismatic private man and committed father He traces Trudeau's deep friendships with women especially many of them talented artists like Barbra Streisand and bitter enmities his marriage and family tragedy He illuminates his strengths and weaknesses from Trudeaumania to political disenchantment from his electrifying response to the kidnappings during the October Crisis to his all important patriation of the Canadian Constitution and his evolution to influential elder statesman Privatization and State-Owned Enterprises Paul W. Macavoy, W.T. Stanbury, George Yarrow, Richard Zeckhauser, 2012-12-06 The book is divided into three major sections The first presents a theoretical discussion that underlies the other essays The second section deals with privatization issues from the perspective of the United States The third describes research addressed to the U.K. and Canada In the first chapter Richard Zeckhauser and Murray Horn develop a wide ranging theoretical framework for assessing the capabilities and role of state owned enterprises it provides a foundation for the analyses that follow In The Control and Performance of State Owned Enterprises they describe state owned enterprises as an extreme case of the separation of ownership and control The focus is on management the incentives it faces and the conflicts to which it is subjected The distinguishing characteristics of public enterprise the authors suggest give it a comparative advantage over both public bureaucracy and private enterprise in certain situations They argue that legislators are more likely to prefer SOEs over private enterprise when the efficiency of private enterprise is undermined by regulation or the threat of opportunistic state action when the informational demands of subsidizing private production to meet distributional objectives are high when it is difficult to assign property rights or when state ownership is ideologically appealing These considerations suggest why SOEs are usually assigned special rights and responsibilities and they help explain observed regularities in the distribution of SOEs across countries and sectors Zeckhauser and Horn apply principal agent theory to identify the key factors underlying the performance of state owned

enterprises Oil, the State, and Federalism John Erik Fossum,1997-01-01 John Erik Fossum explores the reasons for the federal government's intervention in the energy industry between 1973 and 1984 and shows how its initial objectives failed culminating in the privatization of Petro Canada in 1990 *Designing Bureaucracies* James A. Desveaux,1995 Drawing upon evidence from recent experiments in energy policy making in Canada this book explores the strategic consequences of bureaucratic change focussing on the technical and political roles of bureaucrats in determining large scale policy outcomes

1960s *The Sorcerer's Apprentices* Peter Foster, 1983 This tragic story set in southern Turkey takes place in an area where feudal conditions still exist Developing Alberta's Oil Sands Paul Anthony Chastko, 2004 Alberta's oil sands represent a vast and untapped oil reserve that could reasonably supply all of Canada's energy needs for the next 475 years. With an estimated 300 billion barrels of recoverable oil at stake the quest to develop this natural resource has been undertaken by many powerful actors both nationally and internationally. Using research that integrates the economic, political, scientific and business factors that have been influential in discovering and developing the sands, this book provides a comprehensive history of the oil sands project and a window on the nature of the complex relationships between industry, government and transnational players. This book is the first comprehensive volume that examines the origins and development of the oil sands industry over the last century. *Carbon Province, Hydro Province* Douglas Macdonald, 2020-04-02 Why has Canada been unable to achieve any of its climate change targets? Part of the reason is that emissions in two provinces, Alberta and Saskatchewan, already about half the Canadian total when taken together, have been steadily increasing as a result of expanding oil and gas production. Declining emissions in other provinces such as Ontario, Quebec, Nova Scotia and New Brunswick have been cancelled out by those western increases. The ultimate explanation for Canadian failure lies in the differing energy interests of the western and eastern provinces overlaid on the confederation fault line of western alienation. Climate, energy and national unity form a toxic mix. How can Ottawa possibly get all the provinces moving in the same direction of decreasing emissions? To answer this question Douglas Macdonald explores the five attempts to date to put in place coordinated national policy in the fields of energy and climate change, from Pierre Trudeau's ill-fated National Energy Program to Justin Trudeau's bitterly contested Pan-Canadian program, analysing and comparing them for the first time. Important new insights emerge from this analysis which in turn provide the basis for a new approach. *Carbon Province, Hydro Province* is a major contribution to the vital question of how our federal and provincial governments can effectively work together and thereby for the first time achieve a Canadian climate change target.
