*The Cult of Divine Birth in Ancient Greece* M. Rigoglioso, 2009-04-26 Greek religion is filled with strange sexual artifacts stories of mortal women's couplings with gods rituals like the basilinna's marriage to Dionysus beliefs in the impregnating power of snakes and deities the unusual birth stories of Pythagoras Plato and Alexander and more In this provocative study Marguerite Rigoglioso suggests such details are remnants of an early Greek cult of divine birth not unlike that of Egypt Scouring myth legend and history from a female oriented perspective she argues that many in the highest echelons of Greek civilization believed non ordinary conception was the only means possible of bringing forth individuals who could serve as leaders and that special cadres of virgin priestesses were dedicated to this practice Her book adds a unique perspective to our understanding of antiquity and has significant implications for the study of Christianity and other religions in which divine birth claims are central The book's stunning insights provide fascinating reading for those interested in female inclusive approaches to ancient religion      *Ancient Moon Wisdom* Miriam Maron, 2012-12-14 Long ago mystics believed that along with every renewal of the phases of the Moon came shifts within the souls of all stones plants animals and yes even humans This book highlights these shifts and explains how we are affected by them how to tap into them for wholesome living and how to engage obstacles we might encounter along the way Drawing from a rich treasury of ancient Hebraic mystery wisdom and her many years of experience as a spiritual healer and counselor Miriam Maron introduces us to the remarkable interplay between the months of the yearly cycle and tribal archetypes in the Hebraic tradition She discusses each month's corresponding animal mineral and plant totems In *Ancient Moon Wisdom* one will discover important life lessons from the histories and mythologies surrounding these archetypes and the deeper meanings behind each of their corresponding months all of which will prove helpful in one's personal unfolding      **A Book of Quotations** W. Kathy McReynolds,2004 Author Kathy McReynolds argues that the modern self can indeed become self fulfilled but not truly happy with the help of science especially biotechnology She draws upon the classical and modern theories of Aristotle and Francis Bacon to reconsider the idea of the soul This book offers a unique perspective to the interesting and necessary discussion of the soul

love q 28 It is thus an introduction to the entire phenomenon of love both as a bodily passion and an act of the will The purpose is to present the Thomistic and broadly scholastic account of human and divine love from a philosophical and theological perspective It aims to be a theological and philosophical study of the topic useful both for a graduate professional audience as part of an undergraduate or graduate course and perhaps for the educated reader The thesis of the book is that contrary to contemporary conceptions not all loves are created equal Some loves perfect us and some loves corrupt us The worth of a love depends on its object and end St Thomas thus presents an objective and teleological account of human and divine love that is of philosophical and theological interest The method is broadly exegetical presenting a careful reading of the text and supplying the philosophical and theological background which the text of Aquinas assumes The scope of the work is limited to three questions ST I II qq 26 28 References to interpretative disputes of Aquinas and references to further resources in the secondary literature will be mostly limited to the footnotes making the body of the text accessible to more readers
