An aerial photograph of St. Mark's Square (Piazza San Marco) in Venice, Italy. The square is a large, open, paved area with two prominent white columns standing in the center. Numerous people are walking across the square, and their long shadows are cast across the pavement. In the background, the Venetian lagoon is visible, with several gondolas and other small boats moored along the edge. The water is a deep blue-green color.

## Souls Of Venice:

Empire of Souls Stefania Tutino, 2010-10-21 The first full length study of the impact of Bellarmine's potestas indirecta in early modern Europe this book follows the reactions to Bellarmine's theory across national and confessional boundaries It offers a fresh interpretation of some of the most crucial political and theological knots in the history of post Reformation Europe and challenges our understanding of modern notions of power and authority The Souls of Venice Janet

Sethre, 2003-01-01 How is a life defined by a city and a city by the lives within Where do an individual and a culture coincide Perhaps more than any city in the world Venice inspires these questions and suggests intriguing answers This book focuses on people who have been shaped by Venice and have shaped Venice in their turn The author considers them in five groups the mutilated culture heroes e.g. the eunuch Narses who despite or because of some great sacrifice helped the city define itself and its mission the fugitives from splendor e.g. St Pietro Orseolo or El Greco so overwhelmed by beauty that they fled the city the prisoners of Venice the convicts the cloistered the mad the symbiotics who lived in close communion with the city for long periods of time e.g. Titian and the fugitives from self e.g. Igor Stravinsky who have come from elsewhere seeking a new identity and who ended up helping to create a new identity for the city itself More than a collection of biographies this richly textured and insightful work examines the roots of people's Venice-ness as well as the city's own humanity **The**

*Two-Soul'd Animal* James Jaehoon Lee, 2019-03-15 *The Two Soul'd Animal* illuminates an early modern debate that recognized the troubling extent to which Christian thought had defined the human in terms of two incompatible models of soul As the sixteenth century progressed Christian and humanist thinkers began to realize that these two souls fundamentally contradicted each other On the one hand Christian theology had a great debt to Aristotle's tripartite model of the soul based on three organic faculties intellection sensation and nutrition On the other the Christian soul was defined by its immortal immaterial and transcendental substance The sixteenth century acknowledgement of the two souls provoked a great deal of anxiety leading Christian thinkers to ask How can we as God's perfect design have two redundant and yet contradictory souls And how could the core of the religious subject possibly be defined by a psychological paradox As a result the soul was an intrinsically unstable term being renegotiated in Renaissance culture The English writers studied in *The Two Soul'd Animal* place two prevailing interpretations of the soul's faculties one rhetorical on the plane of aesthetics the other theological on the plane of ethics into contact as a way to construct a new mode of Christian agency *Soul Mates* Richard
