Sounding Otherness in Early Modern Drama and Travel Jennifer Linhart

Wood,2019-04-23 Winner of the Medieval and Renaissance Drama Society s 2021 Bevington Award for Best New Book Sounds are a vital dimension of transcultural encounters in the early modern period Using the concept of the soundwave as a vibratory uncanny and transformative force Jennifer Linhart Wood examines how sounds of foreign otherness are experienced and interpreted in cross cultural interactions around the globe Many of these same sounds are staged in the sonic laboratory of the English theater rattles were shaken at Whitehall Palace and in Brazil bells jingled in an English masque and in the New World the Dallam organ resounded at Topkap Palace in Istanbul and at King s College Cambridge and the drum thundered across India and throughout London theaters This book offers a new way to conceptualize intercultural contact by arguing that sounds of otherness enmesh bodies and objects in assemblages formed by sonic events calibrating foreign otherness with the familiar self on the same frequency of vibration

Expression and Truth Lawrence Kramer, 2012-09-23 Expression and truth are traditional opposites in Western thought expression supposedly refers to states of mind truth to states of affairs Expression and Truth rejects this opposition and proposes fluid new models of expression truth and knowledge with broad application to the humanities These models derive from five theses that connect expression to description cognition the presence and absence of speech and the conjunction of address and reply The theses are linked by a concentration on musical expression regarded as the ideal case of expression in general and by fresh readings of Ludwig Wittgenstein's scattered but important remarks about music The result is a new conception of expression as a primary means of knowing acting on and forming the world Recent years have seen the return of the claim that music's power resides in its ineffability In Expression and Truth Lawrence Kramer presents his most elaborate response to this claim Drawing on philosophers such as Wittgenstein and on close analyses of nineteenth century compositions Kramer demonstrates how music operates as a medium for articulating cultural meanings and that music matters too profoundly to be cordoned off from the kinds of critical readings typically brought to the other arts A tour de force by one of musicology's most influential thinkers Susan McClary Desire and Pleasure in Seventeenth Century Music

Audio Culture, Revised Edition Christoph Cox, Daniel Warner, 2017-07-27 The groundbreaking Audio Culture Readings in Modern Music Continuum September 2004 paperback original maps the aural and discursive terrain of vanguard music today Rather than offering a history of contemporary music Audio Culture traces the genealogy of current musical practices and theoretical concerns drawing lines of connection between recent musical production and earlier moments of sonic experimentation It aims to foreground the various rewirings of musical composition and performance that have taken place in the past few decades and to provide a critical and theoretical language for this new audio culture This new and expanded edition of the Audio Culture contains twenty five additional essays including four newly commissioned pieces Taken as a whole the book explores the interconnections among such forms as minimalism indeterminacy musique concrète free improvisation experimental music avant rock dub reggae ambient music hip hop and techno via writings by philosophers cultural theorists and composers Instead of focusing on some crossover between high art and popular culture Audio Culture takes all these musics as experimental practices on par with and linked to one another While cultural studies has tended to look at music primarily popular music from a sociological perspective the concern here is philosophical musical and historical Audio Culture includes writing by some of the most important musical thinkers of the past half century among them John Cage Brian Eno Ornette Coleman Pauline Oliveros Maryanne Amacher Glenn Gould Umberto Eco Jacques Attali Simon Reynolds Eliane Radigue David Toop John Zorn Karlheinz Stockhausen and many others Each essay has its own short introduction helping the reader to place the essay within musical historical and conceptual contexts and the volume concludes with a glossary a timeline and an extensive discography
