the psyche powers that are critical to the development of a sustained cultural commitment to peace and to the deepening and revitalizing of contemporary psychological life The Living Church ,1907 Sounds of Hope Robert Janacek,2012-07-01 For a world so out of tune this treatise intends to correlate from various instruments of learning a new sound a sound of hope This sound will be heard as each truth from key areas of knowledge will be played in a synthesis of theology psychology and philosophy all in the context of a valid cosmology To listen and read the key concepts and predictions of the secular authorities our earth is either destined for a massive freeze or one ending in conflagration Thus the concern of the author is that all too often each area of study is playing its own sound and valid as it may be is not listening or seeing what could be if these sounds became part of a symphony In Sounds of Hope Robert N Janacek contends that when these sounds are truly heard and projected in our anticipated symphony a new and harmonious world will be enacted At a time when there are almost constant sounds of hate death and hopelessness a world awaits one for us to hear and attend as a new concert a concert playing a score of harmony and hope
