Sweet Invisible Body Reflections On A Life With Diabetes:

Sweet Invisible Body Lisa Roney, 2000-08 Now in paperback this vivid and often beautifully written account of the realities of diabetes Chicago Tribune is essential reading for diabetics and their friends and families Lisa Roney was diagnosed with diabetes just before her twelfth birthday This is her candid and exquisitely written account of how the disease directly affects the choices she makes every day in every aspect of her life from food and exercise to career and family What sets this apart from other testimonies about living with an illness is Roney's remarkable willingness to reveal the usually hidden emotional consequences of her affliction erosion of her self esteem feelings of vulnerability the influence on her sexual choices and heightened awareness of mortality Full of wisdom humor and practical advice *Sweet Invisible Body* will be welcomed by diabetics and their friends and families who have never before had a spokesperson as articulate honest and insightful as Lisa Roney *Infertility Comics and Graphic Medicine* Chinmay Murali, Sathyaraj Venkatesan, 2021-07-13

Infertility Comics and Graphic Medicine examines women's graphic memoirs on infertility foregrounding the complex interrelationship between women's life writing infertility studies and graphic medicine Through a scholarly examination of the artists use of visual verbal codes of the comics medium in narrating their physical ordeals and affective challenges occasioned by infertility the book seeks to foreground the intricacies of gender identity embodiment subjectivity and illness experience Providing long overdue scholarly attention on the perspectives of autobiographical and comics studies the authors examine the gendered nature of the infertility experience and the notion of motherhood as an ideological force which interpolates socio cultural discourses accentuating the potential of graphic medicine as a creative space for the infertile women to voice their hitherto silenced perspectives on childlessness with force and urgency This interdisciplinary volume will be of interest to scholars and students in comics studies the health humanities literature and women's and gender studies and will also be suitable for readers in visual studies and narrative medicine **The Logic of Care** Annemarie Mol, 2008-05-24 Shortlisted for the BSA Sociology of Health and Illness Book Prize 2010 What is good care In this innovative and compelling book Annemarie Mol argues that good care has little to do with patient choice and therefore creating more opportunities for patient choice will not improve health care Although it is possible to treat people who seek professional help as customers or citizens Mol argues that this undermines ways of thinking and acting crucial to health care Illustrating the discussion with examples from diabetes clinics and diabetes self care the book presents the logic of care in a step by step contrast with the logic of choice She concludes that good care is not a matter of making well argued individual choices but is something that grows out of collaborative and continuing attempts to attune knowledge and technologies to diseased bodies and complex lives Mol does not criticise the practices she encountered in her field work as messy or ad hoc but makes explicit what it is that motivates them an intriguing combination of adaptability and perseverance *The Logic of Care* Health and the problem of patient choice is crucial reading for all those interested in the theory and practice of care including

sociologists anthropologists and health care professionals It will also speak to policymakers and become a valuable source of inspiration for patient activists Emerging Genres in New Media Environments Carolyn R. Miller, Ashley R.

Kelly, 2016-11-25 This volume explores cultural innovation and transformation as revealed through the emergence of new media genres New media have enabled what impresses most observers as a dizzying proliferation of new forms of communicative interaction and cultural production provoking multimodal experimentation and artistic and entrepreneurial innovation Working with the concept of genre scholars in multiple fields have begun to explore these processes of emergence innovation and stabilization Genre has thus become newly important in game studies library and information science film and media studies applied linguistics rhetoric literature and elsewhere Understood as social recognitions that embed histories ideologies and contradictions genres function as recurrent social actions helping to constitute culture Because genres are dynamic sites of tension between stability and change they are also sites of inventive potential Emerging Genres in New Media Environments brings together compelling papers from scholars in Brazil Canada England and the United States to illustrate how this inventive potential has been harnessed around the world *In Sickness and in Play* Cindy Dell Clark, 2003 The author's 46 interviews with the families of children with chronic illness give an understanding of how the children comprehend their illnesses and how parents struggle daily to care for their kids while trying to give them a normal childhood

Memoir G. Thomas Couser, 2012-01-19 A compact pithy guide to the most popular form of life writing Memoir An Introduction provides a primer to the ubiquitous literary form and its many subgenres Pilgrims in Medicine: Conscience, Legalism and Human Rights Thomas Faunce, 2005-02-01 This arrestingly novel work develops a normative synthesis of medical humanities virtue ethics medical ethics health law and human rights It presents an ambitious complex and coherent argument for the reconceptualisation of the doctor patient relationship and its regulation utilising approaches often thought of as being separate if not opposed virtue based ethics and universal human rights The case is argued gracefully with moderation but also with respect for opposing positions The book's analysis of the foundational professional virtue of therapeutic loyalty is an original departure from the traditional discourse of patient autonomy and the ethical and legal duties of the medical practitioner The central argument is not merely presented as bookends in the introduction and conclusion It is cogently represented in each chapter and section and measured against the material considered A remarkable feature is the use of aptly selected canonical literature to inform the argument These references run from Hesse's *The Glass Bead Game* in the abstract to Joyce's *Ulysses* in the conclusion They include excerpts from and discussion about Bergman Borges Boswell Tolstoy de Beauvoir Chekhov Dostoevsky Samuel Johnson Aristotle Orwell Osler Chaucer Schweitzer Shakespeare Thorwalds Kafka and William Carlos Williams Such references are used not merely as an artistic and decorative leitmotif but become a critical narrative element and another complex and rich layer to this work The breadth and quality of the references are testimony to the author's clear understanding of the modern law and literature movement This

work provides the basis of a medical school course As many medical educators as possible should also be encouraged to read this work for the insights it will give them into using their own personal life narratives and those of their patients to inform their decision making process This thesis will also be of value to the judiciary whose members are often called upon to make normatively difficult judgments about medical care and medical rules The human rights material leads to a hopeful view of an international movement toward a universal synthesis between medical ethics and human rights in all doctor patient relationships

Fiction as Research Practice Patricia Leavy, 2016-06-16 The turn to fiction as a social research practice is a natural extension of what many researchers and writers have long been doing Patricia Leavy a widely published qualitative researcher and a novelist explores the overlaps and intersections between these two ways of understanding and describing human experience She demonstrates the validity of literary experimentation to the qualitative researcher and how to incorporate these practices into research projects Five short stories and excerpts from novellas and novels show these methods in action This book is an essential methodological introduction for those interested in studying or practicing arts based research
