Chambers,2023-08-12 All fruits should if possible be freshly picked for preserving canning and jelly making No imperfect fruit should be canned or preserved Gnarly fruit may be used for jellies or marmalades by cutting out defective portions Bruised spots should be cut out of peaches and pears In selecting small seeded fruits like berries for canning those having a small proportion of seed to pulp should be chosen In dry

seasons berries have a larger proportion of seeds to pulp than in a wet or normal season and it is not wise to can or preserve such fruit unless the seeds are removed The fruit should be rubbed through a sieve that is fine enough to keep back the seeds The strained pulp can be preserved as a pur e or marmalade When fruit is brought into the house put it where it will keep cool and crisp until you are ready to use it Begin by having the kitchen swept and dusted thoroughly that there need not be a large number of mold spores floating about Dust with a damp cloth Have plenty of hot water and pans in which jars and utensils may be sterilized Have at hand all necessary utensils towels sugar etc Prepare only as much fruit as can be cooked while it still retains its color and crispness Before beginning to pare fruit have some syrup ready if that is to be used or if sugar is to be added to the fruit have it weighed or measured [Fabulous Fruit Desserts](#) Terence Janericco,1986 **Fruits**
