**Swords of the British Army** Brian Robson,1975      **The Book of the Sword** Sir Richard Francis Burton,1884      **War and the Making of Medieval Monastic Culture** Katherine Allen Smith,2013-09-19 Finalist for AAH First Book Prize

The monastic life traditionally considered as an area of withdrawal from the world is here shown to be shaped by metaphors of war and to be actively engaged with battle in the world outside An extremely interesting and important book makes an important contribution to the history of medieval monastic spirituality in a formative period whilst also fitting into wider debates on the origins development and impact of ideas on crusading and holy war Dr William Purkis University of Birmingham Monastic culture has generally been seen as set apart from the medieval battlefield as those who prayed were set apart from those who fought However in this first study of the place of war within medieval monastic culture the author shows the limitations of this division Through a wide reading of Latin sermons letters and hagiography she identifies a monastic language of war that presented the monk as the archetypal soldier of Christ and his life of prayer as a continuous combat with the devil indeed monks claims to supremacy on the spiritual battlefield grew even louder as Church leaders extended the title of soldier of Christ to lay knights and crusaders So while medieval monasteries have traditionally been portrayed as peaceful sanctuaries in a violent world here the author demonstrates that monastic identity was negotiated through real and imaginary encounters with war and that the concept of spiritual warfare informed virtually every aspect of life in the cloister It thus breaks new ground in the history of European attitudes toward warfare and warriors in the age of the papal reform movement and the early crusades Katherine Allen Smith is Assistant Professor of History University of Puget Sound

**The Conquest of Ainu Lands** Brett L. Walker,2001 This model monograph is the first scholarly study to put the Ainu the native people living in Ezo the northernmost island of the Japanese archipelago at the center of an exploration of Japanese expansion during the seventeenth and eighteenth centuries the height of the Tokugawa shogunal era Inspired by new Western historians of the United States Walker positions Ezo not as Japan's northern frontier but as a borderland or middle ground By framing his study between the cultural and ecological worlds of the Ainu before and after two centuries of sustained contact with the Japanese the author demonstrates with great clarity just how far the Ainu were incorporated into the Japanese political economy and just how much their ceremonial and material life not to mention disease ecology medical culture and their physical environment had been infiltrated by Japanese cultural artifacts practices and epidemiology by the early nineteenth century Walker takes a fresh and original approach Rather than presenting a mere juxtaposition of oppression and resistance he offers a subtle analysis of how material and ecological changes induced by trade with Japan set in motion a reorientation of the whole northern culture and landscape Using new and little known material from archives as well as Ainu oral traditions and archaeology Walker poses an exciting new set of questions and issues that have yet to be approached in so innovative and thorough a fashion

of NATO's humanitarian war in Kosovo is it possible to understand or explain wars as an outcome of perceptions of rights? How did rights become divine rights in the Middle Ages, territorial rights in the eighteenth century or human rights today become something that people are willing to fight and die for? To answer these questions, this book explores the linkage between concepts of rights and the practice of war in the international arena. Alkopher describes how normative structures of rights have shaped different practices of war from medieval to modern times through the lens of social constructivism. From the eleventh to the thirteenth century, concepts of divine rights and institutionalized practices of the Crusades to the Holy Land fostered the prevailing ideas of international rights and war. In the eighteenth century, the institutionalization of states rights and territorial wars shaped international conflict. This view held until the late twentieth century when the institutionalization of human rights coupled with the emerging practice of humanitarian war, particularly NATO's war in Kosovo, engendered new norms of international conduct. The author concludes that rights have the power to constitute an international order that will be either cooperative or conflictual and the choice of outcome is very much in our hands. This book will be essential reading for international relations and political science scholars and students but also philosophers, legal and sociological historians, and international lawyers.
