Recto Verso: Redefining the Sketchbook Angela Bartram, Nader El-Bizri, Douglas Gittens, 2016-04-08 Bringing together a broad range of contributors including art architecture and design academic theorists and historians in addition to practicing artists architects and designers this volume explores the place of the sketchbook in contemporary art and architecture Drawing upon a diverse range of theories practices and reflections common to the contemporary conceptualisation of the sketchbook and its associated environments it offers a dialogue in which the sketchbook can be understood as a pivotal working tool that contributes to the creative process and the formulation and production of visual ideas Along with exploring the theoretical

philosophical psychological and curatorial implications of the sketchbook the book addresses emergent digital practices by way of examining contemporary developments in sketchbook productions and pedagogical applications Consequently these more recent developments question the validity of the sketchbook as both an instrument of practice and creativity and as an educational device International in scope it not only explores European intellectual and artistic traditions but also intercultural and cross cultural perspectives including reviews of practices in Chinese artworks or Islamic calligraphy and situational contexts that deal with historical examples such as Roman art or modern practices in geographical cultural regions like Pakistan
