The Radicalization of Cicero Katherine A. East, 2017-06-28 This book uses a previously overlooked Neo Latin treatise Cicero Illustratus to provide insight into the status and function of the Ciceronian tradition at the beginning of the eighteenth century and consequently to more broadly illuminate the fate of that tradition in the early Enlightenment Cicero Illustratus itself is the first subject for inquiry mined for what its deliberately erudite and colorfully polemical passages of scholarly stratagems reveal about Ciceronian scholarship and the motives for exploring it within the context of early Enlightenment thought It also includes an analysis of the role played by the Ciceronian tradition in the broader political and radical movements that existed in the Enlightenment with particular attention paid to Cicero's unexpectedly prominent position in major political and philosophical Republican and Erastian works The subject of this book together with the conclusions reached will provide scholars and students with crucial new material relating to the classical tradition the history of scholarship and the intellectual history of the early Enlightenment

Thomas Erastus and the Palatinate Charles Gunnoe, 2010-10-15 This study is the first monograph to attempt a synthetic treatment of the career of Thomas Erastus 1524-1583 Erastus was a central player in the conversion of the Electoral Palatinate to Reformed Christianity in the early 1560s and a co author of the Heidelberg Catechism In the church discipline controversy of the 1560s and 1570s Erastus opposed the Calvinist effort to institute a consistory of elders with independent authority over excommunication Erastus's defeat in this controversy and the ensuing Antitrinitarian affair proved the watershed of his career He turned to the refutation of Paracelsus and a debate with Johann Weyer on the punishment of witches The epilogue tracks Erastus's later career and the reception of his works into the seventeenth century

Academic Theories of Generation in the Renaissance Linda Deer Richardson, 2018-01-17 This volume deals with philosophically grounded theories of animal generation as found in two different traditions one deriving primarily from Aristotelian natural philosophy and specifically from his *Generation of Animals* and another deriving from two related medical traditions the Hippocratic and the Galenic The book contains a classification and critique of works that touch on the history of embryology and animal generation written before 1980 It also contains translations of key sections of the works on which it is focused It looks at two different scholarly communities the physicians *medici* and philosophers *philosophi* that share a set of textual resources and philosophical lineages as well as a shared problem explaining animal generation but that nevertheless have different concerns and commitments The book

demonstrates how those working in these two traditions not only shared a common philosophical background in the arts curricula of the universities but were in constant intercourse with each other This book presents a test case of how scholarly communities differentiate themselves from each other through methods of argument empirical investigation and textual interpretations It is all the more interesting because the two communities under investigation have so much in common and yet in the end are distinct in a number of important ways **The New Scholasticism** ,1939 Includes section Book Reviews

The Living Age ,1893 **Delineation of Roman Catholicism, ... in which the peculiar doctrines ... of the Church of Rome are stated, and confuted** Charles ELLIOTT (D.D.),1844 *Dictionarium Selectorum Casuum Conscientiæ* ,1733 **An Introduction to Latin Syntax,or An Exemplification of the Rules of Construction, [etc.]** John Mair,1793 *The Body of the Artisan* Pamela H. Smith,2024-05-31 Since the time of Aristotle the making of knowledge and the making of objects have generally been considered separate enterprises Yet during the late sixteenth and early seventeenth centuries the two became linked through a new philosophy known as science In *The Body of the Artisan* Pamela H Smith demonstrates how much early modern science owed to an unlikely source artists and artisans From goldsmiths to locksmiths and from carpenters to painters artists and artisans were much sought after by the new scientists for their intimate hands on knowledge of natural materials and the ability to manipulate them Drawing on a fascinating array of new evidence from northern Europe including artisans objects and their writings Smith shows how artisans saw all knowledge as rooted in matter and nature With nearly two hundred images *The Body of the Artisan* provides astonishingly vivid examples of this Renaissance synergy among art craft and science and recovers a forgotten episode of the Scientific Revolution an episode that forever altered the way we see the natural world **The Library of Thomas Cranmer** David G. Selwyn,1996
 An Universal History ,1782 *The Church Historians of England* ,1855 **The Acts and Monuments of John Foxe** John Foxe,George Townsend,1844 *The history of the world* Sir Walter Raleigh,1829
