Symbolic Communities:

Symbolic Communities Albert Hunter,1982 Symbolic Construction of Community Anthony P. Cohen,2013-03-07

Anthony Cohen makes a distinct break with earlier approaches to the study of community which treated the subject in largely structural terms His view is interpretive and experiential seeing the community as a cultural field with a complex of symbols whose meanings vary among its members He delineates a concept applicable to local and ethnic communities through which people see themselves as belonging to society The emphasis on boundary is sensitive to the circumstances in which people become aware of the implications of belonging to a community and describes how they symbolise and utilise these

boundaries to give substance to their values and identities The Unbounded Community Kenneth A. Scherzer,2014-12-01

Stick ball stoop sitting pickle barrel colloquys The neighborhood occupies a warm place in our cultural memory a place that Kenneth A Scherzer contends may have more to do with ideology and nostalgia than with historical accuracy In this remarkably detailed analysis of neighborhood life in New York City between 1830 and 1875 Scherzer gives the neighborhood its due as a complex richly textured social phenomenon and helps to clarify its role in the evolution of cities After a critical examination of recent historical renderings of neighborhood life Scherzer focuses on the ecological symbolic and social aspects of nineteenth century community life in New York City Employing a wide array of sources from census reports and church records to police blotters and brothel guides he documents the complex composition of neighborhoods that defy simple categorization by class or ethnicity From his account the New York City neighborhood emerges as a community in flux born out of the chaos of May Day the traditional moving day The fluid geography and heterogeneity of these neighborhoods kept most city residents from developing strong local attachments Scherzer shows how such weak spatial consciousness along with the fast pace of residential change diminished the community function of the neighborhood New Yorkers he suggests relied instead upon the unbounded community a collection of friends and social relations that extended throughout the city With pointed argument and weighty evidence The Unbounded Community replaces the neighborhood of nostalgia with a broader multifaceted conception of community life Depicting the neighborhood in its full scope and diversity the book will enhance future forays into urban history **The Scioto Hopewell and Their Neighbors** Daniel Troy Case,Christopher Carr,2008-07-09 Bioarchaeological Documentation and Cultural Understanding

Handbook of Community Movements and Local Organizations Ram A. Cnaan, Carl

Milofsky, 2006-11-28 Although the way associations and the organization of local social life are intertwined is one of the oldest approaches to community study the way citizens and residents come together informally to act and solve problems has rarely been a primary focus Associations are central to important and developing areas of social theory and social action This handbook takes voluntary associations as the starting point for making sense of communities It offers a new perspective on voluntary organizations and gives an integrated yet diverse theoretical understanding of this important aspect of community life

volume will at least present readers with a broad sampling if not a comprehensive treatment of the topic **Interpretive Approaches to Interpersonal Communication** Kathryn Carter, Mick Presnell, 1994-01-01 The authors fill two contemporary needs 1 they provide a collection of essays that raises theoretical and methodological issues in the study of interpersonal communication relevant to all researchers in this area of study and 2 they present a general approach to interpersonal communication that has gained wide acceptance among practitioners and educators but has been under represented by advanced research texts **Management of Broadband Technology and Innovation** Jyoti

Choudrie, Catherine Middleton, 2013-11-12 When one considers broadband the Internet immediately springs to mind However broadband is impacting society in many ways For instance broadband networks can be used to deliver healthcare or community related services to individuals who don't have computers have distance as an issue to contend with or don't use the internet Broadband can support better management of scarce energy resources with the advent of smart grids enables improved teleworking capacity and opens up a world of new entertainment possibilities Yet scholarly examinations of broadband technology have so far examined adoption usage or diffusion but missed exploring the capacity of broadband networks to enable new applications the management aspects of funding and developing broadband enabled services or the policy environment in which such networks are developed This book explores a wide range of issues associated with the deployment and use of broadband including its impacts on individuals organizations and society and offers a generalist understanding of the technical aspects of broadband Management of Broadband Technology and Innovation offers insights on broadband from the perspectives of Information Systems Management Strategy and Communications Policy scholars drawing on research from these disciplines to inform diverse aspects of broadband deployment policy and use Issues associated with a subject technical in nature but now researched in many ways are emphasised This book explains various softer aspects of broadband deployment and use focusing on the benefits of broadband rather than on details of the technology **Why Place Matters** Saburo Horikawa, 2021-05-31 This book is based on the author's 33 years of intensive

fieldwork It chronicles a major movement that shaped the preservation policy in Japan in the 1980s and 1990s providing thick descriptions of preservationists that are not available anywhere else in English It also provides clear answers to a series of pressing questions about preservationists are they building huggers are they selfish and myopic home owners or are they merely obstacles to urban planning and urban renewal Since 1984 Saburo Horikawa Professor of Sociology at Hosei University in Tokyo has continuously studied the movement to preserve the Otaru Canal in Otaru Japan This book shows that the preservation movement was neither conservative nor an obstacle Rather the movement sought to promote changes in which the residents place would continue to be theirs As such the word preservation does not mean the prevention of growth and development but rather its control As is shown in this study preservation allows for and can even promote change The original Japanese version of this book published by the University of Tokyo Press has won 3 major academic awards most

notably The Ishikawa Prize the highest award bestowed by the City Planning Institute of Japan It is extremely unusual that a sociology book should receive such important recognition from the city planning discipline *Theological Reflection: Methods* Elaine Graham,2013-01-25 This is the first in a two part project aimed at postgraduates and academics interested in the expanding volume of work and research surrounding theological reflection Brought together in Volume one is a comprehensive collection of models of theological reflection By bringing this diverse collection together in one place the editors create a unique reference work that allows a clear and visible contrast and comparison as each model is treated formally and in a standard format Throughout each chapter the distinguishing features of the model are examined the genealogy and origins are discussed worked examples of the model applied to contemporary theology are provided and critical commentary future trends and exercises and questions are provided *Sacred Games, Death, and Renewal in the Ancient Eastern Woodlands* A. Martin Byers,2011-01-16 The book presents an account of the Ohio Middle Woodland period embankment earthworks ca 100 B C to A D 400 that is radically different from the prevailing theory Byers critically addresses all the arguments and characterizations that make up the current treatment of the embankment earthworks and then presents an alternative interpretation This unconventional view hinges on two basic social characterizations the complementary heterarchical community model and the cult sodality heterarchy model Byers posits that these two models interact to characterize the Ohio Middle Woodland period settlement pattern the community was constituted by autonomous social formations clans based on kinship and sodalities based on companionship The individual communities of the region each have their clan components dispersed within a fairly well defined zone while the sodality components of the same set of region wide communities ally with each other and build and operate the embankment earthworks This dichotomy is possible only because the clans and sodalities respect each other as relatively autonomous the affairs of the clans focusing on domestic and family matters remain outside the concerns of the sodalities and the affairs of the sodalities focusing on world renewal and sacred games remain outside the concerns of the clans Therefore two models are required to understand the embankment earthworks and no individual earthwork can be identified with any particular community This radical interpretation grounded in empirical archaeological data as well as the in depth overview of the current theory of the Ohio Middle Woodland period make this book a critically important addition to the perspective of scholars of North American archaeology and scholars grappling with prehistoric social systems **TRAC 2008** Joep Hendriks,2009-04-01 A larger than usual selection of papers from the annual TRAC conference Sessions included Supplying the Army Imperial communication The role of the deceased in Roman society Military identities and Experiencing space and place in the Roman world *The Real Mound Builders of North America* A. Martin Byers,2024-01-08 *The Real Mound Builders of North America* takes the standard position that the cultural communities of the Late Woodland period hiatus when little or no transregional monumental mound building and ceremonialism existed were the linear cultural and social ancestors of the communities

responsible for the monumental earthworks of the unique Mississippian ceremonial assemblage and further these Late Woodland communities were the direct linear cultural and social descendants of those communities responsible for the great Hopewellian earthwork mounds and embankments and its associated unique ceremonial assemblage Byers argues that these communities persisted largely unchanged in terms of their essential social structures and cultural traditions while varying only in terms of their ceremonial practices and their associated sodality organizations that manifested these deep structures This continuist historical trajectory view stands in contrast to the current dominant evolutionary view that emphasizes abrupt social and cultural discontinuities with the Hopewellian ceremonial assemblage and earthworks mounds and embankments
