

3 CONCLUSION

This paper deals with some cataract concepts and also various techniques in cataract detection. Although there exists various challenges in detecting different types of cataract, we have discussed some among them in this paper. Latest application also mentioned in this paper. This survey is basically done to study about the system that is able to detect the early stage of cataract and classify normal cataract and post-cataract eye images.

ACKNOWLEDGEMENT

We are deeply thankful to our guide Ms. Dhanya Sreedharan, Assistant professor of Computer Science and Engineering, for guiding us through the difficult phases of our work and inspiring us during each stage of our work. We express sincere thanks to all other faculty members for encouraging us in each stage.

Symposium On Cataracts Transactions Of T:

A New History Of Cataract Surgery Christopher T. Leffler, 2025-08-14 Cataract surgery has been the procedure which has almost defined the profession of ophthalmology for millennia Patients have understood that cataract surgery could transform their lives in an almost miraculous way Much of the history of this surgery has been handed down to us and on occasion we have inherited some myths along with the facts In this two volume monograph we sought to uncover the reality behind the myths This book is entitled A New History of Cataract Surgery because it is based on original research from primary sources It is the work of 44 co authors from North America Europe the Middle East and Asia It contains new translations from Latin Greek Sanskrit Chinese Arabic Persian French Dutch and German It contains photographs from private collections We sought to tell stories you might have heard a little about from antiquity onward in a new way Many of the chapters in this book covering the 20th century were written by ophthalmologists who lived through the revolutionary changes in their field and were prime movers in making these advances Transactions American Medical Association.
