Synergy Trap:

The Synergy Trap Mark L. Sirower, 1997 This groundbreaking study cited in Business Week explains how companies often pay too much and never realize goals of increased performance and market strength in their quests to acquire other companies By examining such variables as method of payment and strategic relatedness Sirower provides the first formal definitions for synergies 10 illustrations *The Synergy Trap, Asia-Pacific Edition* Mark L. Sirower, 2010-06-15 Every CEO and Corporate Director who has been in the path of the WOW GRAB IT acquisition locomotive should read this book Charles R Shoemate Chairman and CEO Bestfoods With global acquisition activity running into the trillions of dollars the acquisition alternative continues to be the favorite corporate growth strategy of this generation s executives Unfortunately creating shareholder value remains the most elusive outcome of these corporate strategies After decades of research and billions of dollars paid in advisory fees why do these major decisions continue to destroy value Building on his groundbreaking research first cited in Business Week Mark L Sirower explains how companies often pay too much and predictably never realize the promises of increased performance and competitiveness in their quest to acquire other companies Armed with extensive evidence Sirower destroys the popular notion that the acquisition premium represents potential value He provides the first formal and functional definition for synergy the specific increases in performance beyond those already expected for companies to achieve independently Sirower s refreshing nuts and bolts analysis of the fundamentals behind acquisition performance cuts sharply through the existing folklore surrounding failed acquisitions such as lack of strategic fit or corporate culture problems and gives managers the tools to avoid predictable losses in acquisition decisions Using several detailed examples of recent major acquisitions and through his masterful integration and extension of techniques from finance and business strategy Sirower reveals The unique business gamble that acquisitions represent The managerial challenges already embedded in current stock prices The competitive conditions that must be met and the organizational cornerstones that must be in place for any possibility of synergy The precise Required Performance Improvements RPIs implicitly embedded in acquisition premiums and the reasons why these RPIs normally dwarf realistic performance gains The seductiveness and danger of sophisticated valuation models so often used by advisors The Synergy Trap is the first expose of its kind to prove that the tendency of managers to succumb to the up the ante philosophy in acquisitions often leads to disastrous ends for their shareholders Sirower shows that companies must meticulously plan and account for huge uncertainties before deciding to enter the acquisition game To date Sirower s work is the most comprehensive and rigorous yet practical analysis of the drivers of acquisition performance This definitive book will become required reading for managers corporate directors consultants investors bankers and academics involved in the mergers and acquisitions arena

Current Trends in Economics Ahmet Alkan, Charalambos D. Aliprantis, Nicholas C. Yannelis, 2013-04-17 In 1990 the Society for the Advancement of Economic Theory SAET was founded with the main purpose to advance our knowledge in

theoretical economics and to facilitate communication among researchers in economics mathematics game theory and any other field which is potentially useful to economic theory To achieve these goals SAET sponsors the research journal Economic Theory published by Springer Verlag and holds international conferences every other year The first two conferences SAET took place in the island of Cephalonia Greece in the summers of 1993 and 1995 In the summer of 1997 the conference was held in Antalya Turkey The twenty nine papers in this volume are mostly by participants in the Antalya meeting of SAET and form a broad sample of the 150 papers presented there Topics covered include cooperative and noncooperative games social choice and welfare bargaining matchings auctions mechanism design general equilibrium general equilibrium with finance industrial organization macroeconomics and experimental economics We have chosen to present the papers according to the alphabetical order of first author names instead of grouping them by topic or theme We have appended a complete listing of the sessions in the conference together with a list of program committee members and of sponsors at the end of the volume
