Reference Information Model for Clinical Laboratories Henk M. J. Goldschmidt, 1998 It is old news that we are in a new information age And it should come as no surprise that we need new information to help us change our old ways As clinical laboratory scientists physicians and technologists we need new ideas processes tools and technology to transform our healthcare laboratories from production testing operations into information management organisations Our future is providing diagnostic and treatment information regardless where testing is performed and who performs the measurements

To facilitate the transformation to an information management organisation this publication describes a reference information model for healthcare laboratories This model allows us to gain new insights into our operations and organisations and helps us to better define and understand our critical information processes Along with the model they also provide the computer tools to support that transformation and facilitate the new information management organisation By coupling theory with technology they show us the nature of the new organization and start us on the path to the future

Medical Informatics Hsinchun Chen,Sherrilynne S. Fuller,Carol Friedman,William Hersch,2006-07-19 Knowledge Management and Data Mining in Biomedicine covers the basic foundations of the area while extending the foundational material to include the recent leading edge research in the field The newer concepts techniques and practices of biomedical knowledge management and data mining are introduced and examined in detail It is the research and applications in these areas that are raising the technical horizons and expanding the utility of informatics to an increasing number of biomedical professionals and researchers These concepts and techniques are illustrated with detailed case studies The Description Logic Handbook Franz Baader,2003-01-09 Description Logics are a family of knowledge representation languages that have been studied extensively in Artificial Intelligence over the last two decades They are embodied in several knowledge based systems and are used to develop various real life applications The Description Logic Handbook provides a thorough account of the subject covering all aspects of research in this field namely theory implementation and applications Its appeal will be broad ranging from more theoretically oriented readers to those with more practically oriented interests who need a sound and modern understanding of knowledge representation systems based on Description Logics The chapters are written by some of the most prominent researchers in the field introducing the basic technical material before taking the reader to the current state of the subject and including comprehensive guides to the literature In sum the book will serve as a unique reference for the subject and can also be used for self study or in conjunction with Knowledge Representation and Artificial Intelligence courses **Handbook of Medical and Healthcare Technologies** Borko Furht,Ankur Agarwal,2013-11-20

This book equips readers to understand a complex range of healthcare products that are used to diagnose monitor and treat diseases or medical conditions affecting humans The first part of the book presents medical technologies such as medical information retrieval tissue engineering techniques 3D medical imaging nanotechnology innovations in medicine medical wireless sensor networks and knowledge mining techniques in medicine The second half of the book focuses on healthcare technologies including prediction hospital readmission risk modeling e health framework personal Web in healthcare security issues for medical records and personalized services in healthcare The contributors are leading world researchers who share their innovations making this handbook the definitive resource on these topics Handbook of Medical and Healthcare Technologies is intended for a wide audience including academicians designers developers researchers and advanced level students It is also valuable for business managers entrepreneurs and investors within the medical and healthcare industries
