Syntaktische Konstrukties In Gesproken Taal:

Syntaktische konstrukties in gesproken taal Frank Jansen, 1981 *Computational Linguistics in the Netherlands* 2002 Tanja Gaustad, 2003 This volume provides a selection of the papers which were presented at the thirteenth conference on Computational Linguistics in the Netherlands held in Groningen in November 2002 The subjects covered in this book represent a cross section of current research topics in computational linguistics ranging from theoretical to applied research and development The target audience consists of students and scholars of computational linguistics as well as speech and language processing both in academia and industry

Explanation and Linguistic Change Willem F. Koopman, 1987 This volume presents the outcome of a workshop held in Amsterdam in 1985 on the nature even possibility of explanation in Historical Linguistics why changes take place and others do not and why they occur at a particular time and place The workshop and this volume aim to explore questions such as i are the factors which explain the actuation of a change different from those that explain its implementation ii is it possible to give a typology of changes iii should linguistic explanation hope to meet the same requirements as explanation in the pure sciences iv are all linguistic changes necessarily the product of variation v should there be a formal theory of change apart from a general theory of grammar

The Syntax of Dutch Jan-Wouter Zwart, 2011-09-15 Dutch is a West Germanic language closely related to English and German but its special properties have long aroused interest and debate among students of syntax This is an informative guide to the syntax of Dutch offering an extensive survey of both the phenomena of Dutch syntax and their theoretical analyses over the years In particular the book discusses those aspects of Dutch syntax that have played an important role in the development of syntactic theory in recent decades Presupposing only a basic knowledge of syntax and complete with an extensive bibliography this survey will be an important tool for students and linguists of all theoretical persuasions and for anyone working in Germanic linguistics linguistic typology and linguistic theory

Agrammatic Aphasia Lise Menn, Loraine K. Obler, Gabriele Miceli, 1990 This major reference work fills a need long recognized in neurolinguistics a source for analyzable speech transcripts from agrammatic aphasic patients that provides detailed grammatical descriptions and distributional analyses This 3 volume set is unique in that it presents narrative speech from carefully selected clinically comparable patients speakers of 14 languages and parallel narratives by normal speakers For each of the 14 languages there is a case presentation chapter analyzing and discussing the language of agrammatic patients followed by primary data which are organized as follows running text of speech by two patients interlinear morphemic translations of those texts running text of speech elicited from two normal control subjects plus interlinear translations tables and figures analyzing distributional properties of the patients speech results of comprehension tests of the patients transcriptions of patients oral reading and writing samples Neurological information is included with the case presentations and a short grammatical sketch of each language is added to make the work on all languages accessible even to those who only read English Language findings are

presented for English Dutch German Icelandic Swedish French Italian Polish Serbo Croatian Hindi Finnish Hebrew Chinese and Japanese The book is an indispensable reference work for all linguists psycholinguists and neurolinguists who wish to test their theories against a massive body of data

TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

Syntax, Style and Grammatical Norms Christiane Dalton-Puffer, 2006 A selection of papers from the 13th International Conference on English Historical Linguistics ICEHL which took place from 24-28 August 2004 at the University of Vienna P 7

The licensing and usage of topic drop in German Lisa Schäfer, 2025-06-10 This book is concerned with the licensing and usage of the elliptical construction topic drop in German The term topic drop refers to the omission of the preverbal constituent in declarative verb second sentences for example the omission of the subject *ich* I in the sentence *Bin gleich zur ck Am right back* Topic drop exists in most of the Germanic verb second languages and typically occurs in spoken language and text types such as SMS chats notes etc While much of the previous research has focused on individual specific properties of topic drop often adopting a purely theoretical perspective this book presents a systematic investigation of both the syntactic properties and usage conditions of topic drop based on empirical evidence from a corpus study and 12 acceptability rating studies The first part of the book investigates the licensing of topic drop in particular its restriction to the preverbal prefield position The results of four rating studies on topic drop in different prefield configurations lead to a refined prefield condition based on proposals by Rizzi 1994 and Freywald 2020 that is independent of topicality Moreover they inform the discussion on the most suitable syntactic analysis of topic drop supporting a PF deletion approach The second part of the book presents and tests an information theoretic account of topic drop usage that builds on the Uniform Information Density hypothesis Levy Jaeger 2007 In a corpus study and seven rating studies several potential usage factors are investigated including grammatical person and verb predictability The results provide initial evidence suggesting that topic drop usage can be explained by general processing

principles The prefield constituent is omitted when it is redundant and realized overtly when it facilitates the processing of the following verb This information theoretic explanation is based on independently evidenced processing mechanisms bundles isolated claims from the theoretical literature and allows for a unified analysis of topic drop with other types of ellipsis and reduction

The Coherence of Linguistic Communities Karen V. Beaman, Gregory R. Guy, 2022-05-04 This innovative collection brings together a range of perspectives on the notions of orderly heterogeneity and social meaning shedding light on how structured variation and indexicalities of social meaning cohere within linguistic communities This book fills a gap in research on language variation by critically considering the position articulated by Weinrich Labov and Herzog in 1968 that linguistic diversity is systematically organized in ways that reflect and construct social order The volume investigates such key themes as covariation and co occurrence restrictions indexicality perception and social meaning coherence and language change and the structure and measurement of coherence at different levels of analysis This collection advances our understanding of the coherence of linguistic communities through empirical investigations of larger and more diverse sets of variables language varieties speech styles and communities as afforded by the development and advancement of new methods and models in sociolinguistic research This book is of interest to scholars in sociolinguistics language variation and change and formal linguistics as well as those interested in developments on research methods in linguistics

Romance Languages and Linguistic Theory 2005 Sergio Baauw, Franciscus Alphonsus Coenraad Drijckoningen, Manuela Pinto, 2007 The conference series Going Romance is the major European discussion forum for theoretically relevant research on Romance languages where ideas about language and linguistics and about Romance languages are put in an interactive perspective giving space to both universality and Romance internal variation The current volume features a selection of 18 articles out of 28 that were presented during the 19th meeting at Utrecht University December 8 10 2005 Included in this volume are four papers that were presented by invited speakers Belletti Delais Roussarie these reflect both issues discussed in the general session as well as themes of the workshop on acquisition A number of reknown Romance linguists Saltarelli di Sciullo Zubizarreta also contributed to the volume In general contributions bear on a variety of topics in the field of morphology syntax semantics and pragmatics and include the perspective from acquisition

The Acquisition of Dutch Steven Gillis, Annick De Houwer, 1998-01-01 In the present day context of cross linguistic perspectives on language acquisition The Acquisition of Dutch offers a much needed overview of the wealth of Dutch child language research that was hitherto lacking Its comprehensive coverage in terms of topics its many new theoretical contributions and its focus on providing a solid basis for cross linguistic comparisons will be of interest to linguists and psycholinguists studying child language everywhere The volume consists of four thematic chapters preceded by an introductory overview The thematic chapters cover early speech development in the first year of life the acquisition of phonology the lexicon and syntax The

consolidated list of references cover most of the work on Dutch child language in the last few decades

The Limits of Syntax Peter Culicover, Louise McNally, 2020-01-13 The Limits of Syntax is a collection of original never before published essays Each essay explores the ways in which greater incorporation of nonsyntactic explanations into linguistic research may deepen our understanding of problematic linguistic phenomena and at the same time strengthen syntactic research To clarify the limits of syntactic explanation these essayists investigate four areas The first is a set of general issues related to the theory of grammar and the place of syntax in it The second set develops an explanation of the power of semantics pragmatics within a syntactic theory The third addresses the status of syntactic constraints and the fourth seeks to explain the triggering of movement in the so called Minimalist Program and its derivational approach to syntactic representations It seeks to refine the theory of syntax and encourages more adequate characterization of linguistic phenomena The original papers form a coherent presentation

Linguistic Superdiversity in Urban Areas Joana Duarte, Ingrid Gogolin, 2013-12-18 Rapidly increasing migration flows contribute to the development of multiple forms of social and cultural differentiation in urban areas or to super diversity Language diversity is an important part of the resulting new social and cultural constellations Although linguistic diversity is not a new phenomenon per se the response of individuals or education systems to it is still largely based on a monolingual habitus associating one nation or a region within a nation to one language Building on the top quality expertise of researchers from different academic fields the volume offers insights into the study of linguistic diversity from linguistic and education science perspectives The studies derive from different countries different disciplines different research traditions and methodological approaches all aiming towards a better understanding of actual linguistic reality and its consequences for individual language development and for education The book addresses an academic readership and experts who are interested in learning more about linguistic diversity as an inevitable effect of globalisation and on ways to deal with this reality in research as well as practise in urban areas

Constructions and Language Change Alexander Bergs, Gabriele Diewald, 2008-11-03 Studies in diachronic linguistics increasingly acknowledge that linguistic change is highly context dependent and somehow tied to constructions as linguistic units This is the first volume to investigate the role of constructions and the potential of constructional approaches in linguistic change The contributions in this volume comprise both theoretical and empirical studies all of which are accessible for a general audience While some contributions explicitly aim at comparing and unifying concepts from both traditional grammatical theories and recent construction grammar approaches others offer detailed case studies of exemplary problems from a constructional point of view The papers offer a cross linguistic perspective and deal with a number of different language families ranging from Germanic to Austronesian

The Function of Function Words and Functional Categories Marcel den Dikken, Christina Tortora, 2005-08-25 This volume brings together papers which address

a range of issues regarding the syntax of function words and functional categories in the Germanic languages The works offered in this volume derive specifically from comparative studies of Germanic at the same time they all bear directly on long standing problems in syntactic theory and universal grammar The contributions include novel theoretical and empirical approaches to infinitives the syntax and acquisition of Verb Second the structure and interpretation of present tense the syntax and semantics of reflexives the relationship between expletive syntax and the EPP the syntax of possession and the DP internal syntax of pronouns Some contributions present the results of experimental research which provide an entirely fresh perspective on previously unchallenged claims Morphosyntax of Verb Movement C. Jan-Wouter Zwart, 1997

Morphosyntax of Verb Movement discusses the phenomenon of Dutch present in many Germanic languages that the finite verb is fronted in main clauses but not in embedded clauses The theoretical framework adopted is the so called Minimalist Program of Chomsky 1995 the latest developmental stage of generative grammar Taking issue with previous analyses the author argues that phrase structure in Dutch is uniformly head initial and that the finite verb moves to different positions in subject initial main clauses and in inversion constructions The book contains lucid and detailed discussion of many theoretical issues in connection with the Minimalist Program such as the relation between syntax and morphology the nature of syntactic licensing and the structure of the functional domain At the same time it offers a survey of the properties of Dutch syntax a discussion of previous analyses of Dutch syntax and a wealth of material from dialects of Dutch and other Germanic languages Historical Syntax Jacek Fisiak, 2010-11-05
