Syntax Of Ditransitives Evidence From Clitics:

The Syntax of Ditransitives Elena Anagnostopoulou, 2003 The book investigates the nature and properties of indirect objects and develops a typology of double object constructions on the basis of an examination of a variety of data within and across languages It argues for a four class division of double object constructions depending on a type of case on the goal argument and b whether the goal is introduced by a zero applicative head or is an argument of the main verb The central questions addressed revolve around locality case and the structural representation of double object constructions Studies in the Morpho-Syntax of Greek Artemis Alexiadou, 2009-03-26 The volume presents a collection of papers of recent generative work on Modern Greek morpho syntax The book is divided into three parts Part I of the book deals with argument alternations part II with clitics and part III with the syntax and semantics of free relatives The book will be interesting for scholars working on Greek but also in theoretical linguistics as it exemplifies how the study of Greek feeds the development of generative theory The issues discussed in the book are currently highly relevant for the development of a satisfactory theory of comparative syntax as well as the interface between syntax and morphology and syntax and semantics Thus the analyses put forth here will contribute to the elaboration of such a theory and to our understanding of cross linguistic variation

Ditransitive structures : the English preposition TO and the Romanian preposition LA Tania MORARU-ZAMFIR, 2023-01-01 This book examines the syntactic properties of the English preposition to and the Romanian preposition la at to within ditransitive structures Being a study of comparative syntax from a generative perspective it aims at bringing into discussion the properties of these two functional prepositions in both English and Romanian The comparative approach shows that the English to is a functional preposition fully predictable from the structure of the verb which can be deleted To is a case marker and the dative arguments introduced by this preposition are DPs By way of contrast Romanian la has shifted from a case marker to a Person marker La has a double status as follows it has a functional status only when the Dat argument analysed as DP can be doubled by the clitic where la is a Person marker In the absence of the clitic la phrases are interpreted as PPs and la will be attributed a lexical status Thus unlike the functional to la is both a functional dative marker and b a core lexical preposition of the location and movement frames where la assigns accusative case to its object

The Syntax of (Anti-)Causatives Florian Schäfer, 2008-06-26 This book develops an approach to the causative alternation that assumes syntactic event decomposition and a configurational theta theory It is couched within the framework of the Minimalist Program and especially within Distributed Morphology Central to the work is the syntax and semantics of canonical external arguments of causative verbs as well as of oblique causers and causative PPs in the context of anticausative verbs in different languages such as Germanic Romance Balkan and Caucasian languages The book also develops a new account of the origin and nature of the morphological marking which is often found on anticausatives across languages The main claim is that this morphology is a reflex of a syntactic way to prohibit the assignment of the external

theta role Moreover the book develops an account about the origin of the implicit agent in generic middles which often bear the same morphology as marked anticausatives

The Wiley Blackwell Companion to Syntax, 8 Volume Set Martin Everaert, Henk Van Riemsdijk, 2017-12-26 An invaluable reference tool for students and researchers in theoretical linguistics The Wiley Blackwell Companion to Syntax Second Edition has been updated to incorporate the last 10 years of syntactic research and expanded to include a wider array of important case studies in the syntax of a broad array of languages A revised and expanded edition of this invaluable reference tool for students and researchers in linguistics now incorporating the last 10 years of syntactic research Contains over 120 chapters that explain analyze and contextualize important empirical studies within syntax over the last 50 years Charts the development and historiography of syntactic theory with coverage of the most important subdomains of syntax Brings together cutting edge contributions from a global group of linguists under the editorship of two esteemed syntacticians Provides an essential and unparalleled collection of research within the field of syntax available both online and across 8 print volumes This work is also available as an online resource at www.companiontosyntax.com

Clitics in Greek Marios Mavrogiorgos, 2010-08-18 This monograph investigates the morpho syntactic and other properties of clitic pronouns in Greek and offers a grammar of proclisis and enclisis in light of Chomsky's 1995 2001a 2005 Minimalist Program It explores the nature of clitics as syntactic topicalizers which are probed by structurally higher verbal heads to which they move and into which they incorporate morpho syntactically A theory is advanced according to which cliticization derives from syntactic agreement between the phi features of a clitic pronoun and a phase head v in the case of proclisis and CM in the case of enclisis Incorporation of the clitic into its host is argued to depend on two factors i e the fact that the clitic only contains a subset of the features of its host and the fact that the edge of the host is accessible Also the syntax of strong pronouns and their relation to clitics of negated imperatives of surrogate imperatives and of free clitic ordering in Greek enclisis are also discussed This monograph would appeal to syntacticians and morphologists as well as to those interested in Greek and more generally in clitic syntax

The Diachrony of Ditransitives Chiara Fedriani, Maria Napoli, 2020-10-26 While ample studies exist on ditransitives in various languages notably from a typological perspective more work needs to be done on identifying the main processes and factors that trigger and constrain the changes they undergo over time The goal of this volume is to help fill this gap by bringing together data and information on individual languages that have thus far been left out of the discussion and by expanding our knowledge of already studied linguistic traditions so as to achieve a broader diachronic description Since one of the distinctive features of ditransitives is their synchronic variability in terms of structural alternation and alignment split diachronic research can throw up new insights into developmental dynamics that are eminently complementary namely on the one hand the emergence development and loss of construction alternation and on the other the acquisition of new functions over time The analyses offered in the book yield different and interconnected answers to the general question of how ditransitives change

by drawing on different functional principles that play a role in the diachronic reorganization of this dynamic domain and by providing a number of original theoretical suggestions

The Syntax of Roots and the Roots of Syntax Artemis Alexiadou, Hagit Borer, Florian Schäfer, 2014 This book investigates the nature and properties of roots the core elements of word meaning In particular chapters examine the interaction of roots with syntactic structure and the role of their semantic and morpho phonological properties in that interaction Issues addressed in the book include the semantics and phonology of roots in isolation and in context the categorial specification of roots and the role of phases in word formation Internationally recognized scholars approach these topics from a variety of theoretical backgrounds drawing on data from languages including German Hebrew and Modern Greek The book will be of interest to linguistics students and researchers of all theoretical persuasions from graduate level upwards

Approaches to Language: Data, Theory, and Explanation Ángel J. Gallego, Aritz Irurtzun, 2020-12-24 The study of language has changed substantially in the last decades In particular the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers judgments surveys corpus studies or fieldwork This move is an enriching feature of contemporary linguistics allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact Chomsky 2005 This has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and accounts At the same time it has also led to subfield isolation and methodological a priori with some researchers even claiming that theoretical linguistics has little to offer to cognitive science see for instance Edelman Phillips den Dikken Bernstein Tortora Sprouse Sch tze Phillips 2013

Manual of Grammatical Interfaces in Romance Susann Fischer, Christoph Gabriel, 2016-09-12 Different components of grammar interact in non trivial ways It has been under debate what the actual range of interaction is and how we can most appropriately represent this in grammatical theory The volume provides a general overview of various topics in the linguistics of Romance languages by examining them through the interaction of grammatical components and functions as a state of the art report but at the same time as a manual of Romance languages

NP-Anaphora in Modern Greek Michael Chiou, 2010-01-08 Anaphora is one of the most fascinating linguistic phenomena as it constitutes a unique and universal property of human language Every single natural language provides linguistic means which facilitate speakers to refer to entities in the world The understanding of the complexity of anaphora and of the problems surrounding it will ameliorate our understanding of the nature of human languages This explains why anaphora constitutes a central research topic in contemporary linguistic science This study examines the phenomenon of NP anaphora with the main focus on modern Greek By maintaining the empirical and theoretical benefits of the classical generative approach to binding in this study we propose a partial pragmatic reduction of the interpretation of NP anaphora in modern Greek in terms of the neo Gricean pragmatic principles of communication The

proposed analysis is articulated on the following basis it is argued that the choice of anaphoric expressions and their interpretation by Greek speakers and addressees respectively is heavily dependent on preference which is regulated by principles of language use and communication Therefore by employing a model which is based on the systematic interaction of the neo Gricean pragmatic principles of communication we provide a neat and more elegant approach to NP anaphora resolution for modern Greek In a nutshell this study offers a quite new perspective into the study of NP anaphora in modern Greek but it is also a little step towards a better understanding of the phenomenon of anaphora across languages

Argument Structure and Syntactic Relations Maia Duguine, Susana Huidobro, Nerea Madariaga, 2010-07-14 The topic of this collection is argument structure The fourteen chapters in this book are divided into four parts Semantic and Syntactic Properties of Event Structure A Cartographic View on Argument Structure Syntactic Heads Involved in Argument Structure and Argument Structure in Language Acquisition Rigorous theoretical analyses are combined with empirical work on specific aspects of argument structure The book brings together authors working in different linguistic fields semantics syntax and language acquisition who explore new findings as well as more established data but then from new theoretical perspectives The contributions propose cartographic views of argument structure as opposed to minimalistic proposals of a binary template model for argument structure in order to optimally account for various syntactic and semantic facts as well as data derived from wider cross linguistic perspectives *Comparative Studies in Germanic Syntax* Jutta M. Hartmann, László Molnárfi, 2006-11-22 This selection of papers presented at the 20th Comparative Germanic Syntax Workshop brings together contributions that address issues in syntactic predication and studies in the nominal system as well as papers on data from the history of English and German Showing a strong comparative commitment the contributions include studies on previously neglected data on case and predicative structures in Icelandic and other Germanic languages on the non syntactic distinction of predicative vs argument NP DPs on quirky V2 in Afrikaans the pronominal system resumptive pronouns with relative clauses in Zurich German as well as historical papers on word formation processes on auxiliary selection in relation to counter factuality and on the development of VO OV orders in the history of English This volume presents a wide range of studies that enrich both the theoretical understanding and the empirical foundation of comparative research on the Germanic languages Agreement and Its Failures Omer Preminger, 2014-09-12 A novel proposal regarding predicate argument agreement that combines detailed empirical investigation with rigorous theoretical discussion In this book Omer Preminger investigates how the obligatory nature of predicate argument agreement is enforced by the grammar Preminger argues that an empirically adequate theory of predicate argument agreement requires recourse to an operation whose obligatoriness is a grammatical primitive not reducible to representational properties but whose successful culmination is not enforced by the grammar Preminger's argument counters contemporary approaches that find the obligatoriness of predicate argument agreement enforced through representational means The most prominent of these is Chomsky's interpretability based

proposal in which the obligatoriness of predicate argument agreement is enforced through derivational time bombs Preminger presents an empirical argument against contemporary approaches that seek to derive the obligatory nature of predicate argument agreement exclusively from derivational time bombs He offers instead an alternative account based on the notion of obligatory operations better suited to the facts The crucial data involves utterances that inescapably involve attempted but failed agreement and are nonetheless fully grammatical Preminger combines a detailed empirical investigation of agreement phenomena in the Kichean Mayan languages Zulu Bantu Basque Icelandic and French with an extensive and rigorous theoretical exploration of the far reaching consequences of these data The result is a novel proposal that has profound implications for the formalism that the theory of grammar uses to derive obligatory processes and properties

A half century of Romance linguistics: Selected proceedings of the 50th Linguistic Symposium on Romance Languages Barbara E. Bullock, Cinzia Russi, Almeida Jacqueline Toribio, 2023-02-14 The present volume presents a selection of the revised and peer reviewed proceedings articles of the 50th Linguistic Symposium on Romance Languages LSRL 50 which was hosted virtually by the faculty and students from the University of Texas at Austin With contributions from rising and senior scholars from Europe and the Americas the volume demonstrates the breadth of research in contemporary Romance linguistics with articles that apply corpus based and laboratory methods as well as theory to explore the structure use and development of the Romance languages The articles cover a wide range of fields including morphosyntax semantics language variation and change sociophonetics historical linguistics language acquisition and computational linguistics In an introductory article the editors document the sudden transition of LSRL 50 to a virtual format and acknowledge those who helped them to ensure the continuity of this annual scholarly meeting

Argument Structure in Flux Elly van Gelderen, Jóhanna Barðdal, Michela Cennamo, 2013-06-15 The present volume is centered around five linguistic themes argument structure and encoding strategies argument structure and verb classes unexpressed arguments split intransitivity and existential and presentational constructions The articles also cover a variety of typologically different languages and they offer new data from under researched languages on the issues of event and argument structure In some cases novel perspectives from widely discussed languages on highly debated topics are offered also addressing more theoretical aspects concerning the predictability and derivation of linking Several contributions apply current models of the lexicon syntax interface to synchronic data Other contributions focus on diachrony and are based on extensive use of corpora Yet others although empirically and theoretically grounded privilege a methodological discussion presenting analyses based on thorough and long standing fieldwork

Symmetry in Syntax Barbara Citko, 2011-04-28 While much has been written on asymmetric aspects of sentence structure symmetric aspects have been largely ignored or claimed to be non existent Does symmetry in syntax exist and if it does how do we account for it In this book Barbara Citko sets out to tackle these questions and offers a unified approach to a number of phenomena that have so far been studied only in isolation Focusing on three core minimalist mechanisms merge

move and labeling she advances a new theory of these mechanisms by showing that under certain well defined circumstances merge can create symmetric structures move can target either of two potentially moveable objects and labels can be constructed symmetrically from the features of two objects This book is aimed at researchers and graduate students interested in minimalist syntax the structure of questions relative clauses coordination double object constructions and copular sentences Morphotactics Karlos Arregi, Andrew Nevins, 2012-05-23 This comprehensive treatment of several phenomena in Distributed Morphology explores a number of topics of high relevance to current linguistic theory It examines the structure of the syntactic and postsyntactic components of word formation and the role of hierarchical featural and linear restrictions within the auxiliary systems of several varieties of Basque The postsyntactic component is modeled as a highly articulated system that accounts for what is shared and what exhibits variation across Basque dialects The emphasis is on a principled ordering of postsyntactic operations based on their intrinsic properties and on the relationship between representations in the Spellout component of grammar with other grammatical modules The analyses in the book treat related phenomena in other languages and thereby have much to offer for a general morphology readership as well as those interested in the syntax morphology interface the theory of Distributed Morphology and Basque **Agreement and Head**

Movement Ian G. Roberts, 2010 An argument that contrary to Chomsky head movement is part of the narrow syntax

Challenging Clitics Christine Meklenborg Salvesen, Hans Petter Helland, 2013-06-15 Challenging Clitics deals with multiple sides of cliticisation from different theoretical frameworks and with data from a number of different languages Unlike many other books on clitics where clitics are considered from a mere syntactical point of view this book also discusses the acquisition of clitics the role of the PF in cliticisation the morphophonological aspects of cliticisation and historical change to name but a few of the approaches presented As such this collection presents cutting edge theoretical considerations as well as new data on clitics Taken together the contributions in this volume not only provide insight into the extremely complex nature of clitics but also into derivations and structures in language that go beyond the study of clitics themselves
