Interactive Learning Through Visualization Steve Cunningham, Roger J. Hubbard, 2012-12-06 This book contains a selection of papers presented at the Computer Graphics and Education 91 Conference held from 4th to 6th April 1991 in Begur Spain The conference was organised under the auspices of the International Federation for Information Processing IPIP Working Group 5 10 on Computer Graphics The goal of the organisers was to take a forward look at the impact on education of anticipated developments in graphics and related technologies such as multimedia in the next five years We felt that at a time when many educational establishments are facing financial stringency and when major changes are taking place in patterns of education and training this could be valuable for both educators and companies developing the technology for educators because they are often too bogged down in day to day problems to undertake adequate forward planning and for companies to see some of the problems faced by educators and to see what their future requirements might be

Thinking the Sculpture Garden Penny Florence, 2020-02-20 This innovative book poses two deceptively simple questions what is a sculpture garden and what happens when you give equal weight to the main elements of landscape planting and artwork Its wide ranging frame of reference including the USA Europe and Japan is brought into focus through Tremenhoe Sculpture Garden Cornwall with which the book begins and ends Effectively less than 15 years old and largely the work of one man Tremenhoe affords an opportunity to examine as work in progress the creation of a new kind of sculpture garden Including a historical overview the book traverses multiple ways of seeing and experiencing sculpture gardens culminating in an exploration of their relevance as cultural ecology in the context of globalisation urbanisation and climate change The thinking here is non dualist and broadly aligned with New Materialisms and Material Feminisms to explore our place as humans in the non human world on which we depend Eminent contributors including John Dixon Hunt George Descombes Bernard Lassus and David Leatherbarrow approach these issues through practices and theories of landscape architecture garden and art making history and writing and philosophy Richly illustrated with over 100 images including a colour plate section the book will primarily appeal to those engaged in professional or academic research along with sculpture garden visitors who will find new and surprising ways of experiencing plants and art in natural and urban settings

Henry Moore, Sculpting the 20th Century Dorothy M. Kosinski, Henry Moore, Julian Andrews, Anita Feldman Bennett, Museum of Fine Arts (Dallas, Tex.), Dallas Museum of Art, Gail Davitt, Elizabeth Ann Brown, Fine Arts Museums of San Francisco, David Cohen, National Gallery of Art (U.S.), Steven A. Nash, Harriet F. Senie, Alan G. Wilkinson, 2001-01-01 Henry Moore 1898 1986 is arguably one of the most famous and beloved sculptors of the twentieth century yet in recent decades his work has fallen out of favor in the world of contemporary art criticism This handsome book examines this intriguing contradiction and seeks to reassess Moore's crucial contribution to art of the last century Looking at Moore's early engagements with primitivism his 1930s dialogue with abstraction and surrealism and his postwar interest in large scale public sculpture the authors show how the sculptor helped to define some of the most significant aspects of modernism The authors also contextualize within the polemics of early modernism Moore's emphasis on direct carving instead of modeling and the necessary balance between abstraction and what he called the psychological human element

Moore's early sculpture largely unfamiliar to the general public is given particular attention enabling the reader to explore the evolution of thematic and formal elements in his work and his ongoing response to different materials. Photographs of some by Moore himself of over 120 works including plasters, maquettes, carvings, bronzes and drawings are featured, many of which are previously unpublished.

Earthworks And Beyond John Beardsley, 2006-06 This volume now includes the most recent and most interesting efforts by artists often in collaboration with architects and city planners to transform ravaged landscapes and desolate cityscapes into pleasure giving parks and artworks. After an introduction tracing the historical roots of art in the landscape, the opening chapter deals with such innovative artists as Robert Smithson, Nancy Holt and Christo who in the 1960s began to free their art from the confines of tradition by constructing monumental sculptures in the environment. The following chapters discuss their predecessors, peers and successors including Constantin Brancusi, James Turrell and many others. The final three chapters explore the increasing involvement of artists in land reclamation and urban design featuring projects by Mel Chin, Maya Lin, Martin Puryear and others.

How Designers are Transforming Healthcare is a bold manifesto for change demonstrating the value of a strategic design led approach. Drawing on a rich array of real world projects, this book illustrates how designers in collaboration with clinicians and consumers are co-creating transformative change across healthcare environments, products, services and systems. In a fascinating multi-voice conversation, this book outlines how design methods and mindsets including co-design, prototyping, design and futures thinking facilitates creative problem solving. The ideas, tools and challenges in How Designers are Transforming Healthcare make it a vital text, a doer's guide for designers, clinicians, academics, consumers and policymakers seeking innovative strategies for engagement, innovation and improvement in healthcare.

Women, Modernity, and Landscape Architecture Sonja Dümpelmann, John Beardsley, 2015-02-11 Modernity was critically important to the formation and evolution of landscape architecture yet its histories in the discipline are still being written. This book looks closely at the work and influences of some of the least studied figures of the era, established and less well known female landscape architects who pursued modernist ideals in their designs. The women discussed in this volume belong to the pioneering first two generations of professional landscape architects and were outstanding in the field. They not only developed notable practices but some also became leaders in landscape architectural education as the first professors in the discipline or prolific lecturers and authors. As early professionals who navigated the world of a male dominated intellectual and menial work force, they were exponents of modernity. In addition, many personalities discussed in this volume were either figures of transition between tradition and

modernism like Silvia Crowe Maria Teresa Parpagliolo or they fully embraced and furthered the modernist agenda like Rosa Kliass Cornelia Oberlander The chapters offer new perspectives and contribute to the development of a more balanced and integrated landscape architectural historiography of the twentieth century Contributions come from practitioners and academics who discuss women based in USA Canada Brazil New Zealand South Africa the former USSR Sweden Britain Germany Austria France and Italy Ideal reading for those studying landscape history women s studies and cultural geography
