their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology Archaeological Resource Management John Carman,2015-09-09 Archaeological Resource Management provides an international comparison of the main practices involved in managing archaeological remains especially their identification and recording their evaluation for significance their preservation and their presentation to the public

*Documenting the Cultural Heritage* Robin Thornes,John Bold,1998-01-01 This publication presents three internationally agreed standards for the documentation of the cultural heritage the Core Data Index to Historic Buildings and Monuments of the Architectural Heritage the International Core Data Standard for Archaeological Sites and Monuments and the core data standard for identifying cultural objects Object ID The standards have been brought together in a single publication to provide a readily accessible guide for use by those responsible for documenting the archaeological architectural and movable heritage *Archaeology* Hannah Cobb,Kevin Greene,Tom Moore,2024-03-19 This fully updated sixth edition of a classic classroom text is essential reading for core courses in archaeology Archaeology An Introduction explains how the subject emerged from an amateur pursuit in the eighteenth century into a serious discipline and explores changing trends in interpretation in recent decades The authors convey the excitement of archaeology while helping readers to evaluate new discoveries by explaining the methods and theories that lie behind them In addition to drawing upon examples and case studies from many regions of the world and periods of the past the book incorporates the authors own fieldwork research and teaching It continues to include key reference and further reading sections to help new readers find their way through the ever expanding range of archaeological publications and online sources as well as colour illustrations and boxed topic sections to increase comprehension Serving as an accessible and lucid textbook and engaging students with contemporary issues this book is designed to support students studying Archaeology at an introductory level New to the sixth edition Inclusion of the latest survey and imaging techniques such as the use of drones and eXtended reality Updated material on developments in dating DNA analysis isotopes and population movement including consideration of the ethical considerations of these techniques Coverage of new developments in archaeological theory such as the material turn ontological turn and work on issues of equality diversity and inclusion A whole new chapter covering archaeology in the present including new

sections on heritage and public archaeology and an updated consideration of archaeology's relationship with the climate crisis A revised glossary with over 200 new additions or updates

Archaeology And Geographic Information Systems Gary R Lock, Zoran Stancic, 2022-03-26 Geographic information systems GIS applications are viewed with increasing interest by the archaeology community and this book with its diversity of topics and authorship should be a useful resource

Complementing the volume *Interpreting Space* Taylor It is apparent that there are fundamental differences between North American and European archaeological uses of GIS Primarily these differences lie in the types of evidence for past landscapes that are available for study in the two continents and secondly in the different approaches to archaeology and specifically the theory and practice of landscape archaeology This title centres on the role of archaeological theory in cultural resource management CRM and in GIS applications generally It showcases the important debate which takes the emphasis away from the technology of GIS and places it back within the central concerns of archaeology and particularly European archaeology Archaeology and GIS includes material on such concerns as CRM applications landscape archaeology intra site applications and explicitly theoretical concerns thus representing the state of GIS applications in European archaeology Contributions come from countries such as France Italy Hungary UK USA the Netherlands the Czech Republic Spain Slovenia and Finland

**Guidance on Inventory and Documentation of the Cultural Heritage** John Bold, Ad hoc Group for Inventory and Documentation Within the Technical Co-operation and Consultancy Programme, Council of Europe. Directorate of Culture and Cultural Heritage, Council of Europe. Technical Co-operation and Consultancy Programme, 2009-01-01 Improved heritage management and the inclusion of heritage in planning and sustainable development processes necessitate inventory and documentation More than mere scientific tools recommended in international agreements inventory and documentation play a strategic role The complexity of the heritage items that now have to be inventoried and their interaction with our everyday living environment require the clear definition and harmonisation of practices at the European level Through its work in the 1960s the Council of Europe helped to lay the methodological bases for inventorying architectural archaeological and movable heritage The efforts to systematise the process came in answer to the broadening meaning of heritage and today new considerations lead us to address such notions as heritage groups The guidelines proposed in this book reflect the work done so far and provide a basis for future research It is part of a series produced under the Technical Co operation and Assistance Programme to present the experience derived from the projects implemented by the Council of Europe

Archaeology and Heritage John Carman, 2003-01-01 Unlike most textbooks on heritage which discuss the creation of heritage as a cultural phenomenon or offer practical guides to heritage practices Archaeology and Heritage takes a fresh approach by providing an introduction to themes in the field of heritage as it relates to the material legacy of our past A

survey of current approaches to theorizing archaeological practice presents some ideas about how we understand and relate to the remains sites structures and buildings that have come to our present from the past The book is divided into seven chapters each preceded by a short interlude which considers the types of literature and ways of talking about heritage which characterize that approach For those not already acquainted with recent archaeological theory the book provides a brief introduction to current trends Each chapter is in turn divided into key points indicated by sub headings and these key points are reiterated at the end of each chapter and are followed by a list of suggested readings

Companion Encyclopedia of Archaeology Graeme Barker, 2002-08-13 This comprehensive fully illustrated Companion answers the need for an in depth archaeology reference that provides authoritative coverage of this complex and interdisciplinary field The work brings together the myriad strands and the great temporal and spatial breadth of the field into two thematically organized volumes In twenty six authoritative and clearly written essays this Companion explores the origins aims methods and problems of archaeology Each essay is written by a scholar of international standing and illustrations complement the text

*A Companion to Archaeology* John Bintliff, 2008-04-15 A Companion to Archaeology features essays from 27 of the world's leading authorities on different types of archaeology that aim to define the field and describe what it means to be an archaeologist Shows that contemporary archaeology is an astonishingly broad activity with many contrasting specializations and ways of approaching the material record of past societies Includes essays by experts in reading the past through art linguistics or the built environment and by professionals who present the past through heritage management and museums Introduces the reader to a range of archaeologists those who devote themselves to the philosophy of archaeology those who see archaeology as politics or anthropology and those who contend that the essence of the discipline is a hard science

**Under Pressure?** Marcel Bradtmöller, Sonja B. Grimm, Astrid J. Nyland, Noa Lavi, 2025-08-07 This open access book gathers different case studies of resilience and coping strategies in hunter gatherer societies who were confronted with natural hazards Joined in this book authors display a range of strategies how people could face natural hazards and climate change how they manage stress at a group or personal level and how they transmit their knowledge about dreadful events and successful responses to later generations Consequently this book is primarily for a scientific audience focused on hunter gatherers but will also provide insights for those interested in human responses to crisis and change

Using Computers in Archaeology Gary Lock, 2003-12-08 Today archaeologists are spending more and more time examining the past with the aid of computers How does this increased dependence on technology affect the theory and practice of archaeology Using Computers in Archaeology is a comprehensive review of computer applications in archaeology from the archaeologist's perspective The book deals with all aspects of the discipline from survey and excavation to museums and education Discussion covers the theoretical aspects of computer applications with particular reference to GIS and the analysis of data but technical jargon is kept to a minimum With numerous illustrations case studies

and examples Using Computers in Archaeology is a timely introduction to this increasingly important area of archaeology catering both for the student and the experienced archaeologist

**Bodmin Moor: An archaeological survey: Volume 1** Nicholas Johnson, Peter Rose, 2014-06-30 Year by year encroachment in the 20th century for cultivation or tree planting provided the stimulus for the most extensive survey ever undertaken of the archaeological monuments of Bodmin Moor a previously little disturbed landscape rich in surviving structural evidence of the many ways from the Bronze Age to the post medieval period in which people settled and exploited the Moor and its surroundings The survey is remarkable not only for the extent of the area examined but also for the number of monuments newly identified in the course of the work

Supplementing the survey text are detailed line drawings plans aerial photographs and large scale maps

**Handbook of Archaeological Methods** Herbert D. G. Maschner, Christopher Chippindale, 2005 The Handbook of Archaeological Methods comprises 37 articles by leading archaeologists on the key methods used by archaeologists in the field in analysis in theory building and in managing cultural resources The book is destined to become the key reference work for archaeologists and their advanced students on contemporary archaeological methods

**Spatial Technology and Archaeology** David Wheatley, Mark Gillings, 2013-02-05 Geographical Information Systems GIS and related spatial technologies have a new and powerful role to play in archaeological interpretation Beginning with a conceptual approach to the representation of space adopted by GIS this book examines spatial databases the acquisition and compilation of data the analytical compilation of data the analysis
