Diverse Careers in Community Psychology Judah J. Viola, Olya Glantsman, 2017-03-29 Community psychology is a diverse field. Community psychologists may work for the government, for nonprofit foundations as researchers or teachers in academic settings, at NGOs as independent consultants overseas in international development and more. Despite such professional diversity, very little information has formally been made available to students and practitioners about the range of careers they can pursue when studying community psychology. *Diverse Careers in Community Psychology* details a range of potential career paths for someone with community psychology or related social science training, describes the different types of careers, e.g. tasks involved, benefits and challenges, salary range etc, and outlines steps one can take to develop such a career. The volume is built on three foundations: 1. a career survey of almost 450 respondents which provides quantitative information about the different types of settings in which individuals with community psychology training might find themselves; 2. more than twenty chapters by contributors who share their personal stories and guidance on how to select, prepare for, find and succeed in careers similar to theirs; 3. and interviews with community psychologists further illustrating examples discussed in the authored chapters. This volume provides both a depth and breadth of information about the possible careers available for someone with community psychology or related training.

Prevention and Treatment of Sports Injuries Darius Cobb, 2018-11-20 Sports injuries are injuries that occur to athletes in major sporting events. In many cases, these types of injuries are due to overuse of a part of the body when participating in a certain activity.
