physiological response but a phenomenon that mothers and physicians perceive through a historical social and cultural lens Wolf examines these influences and argues that medical and lay views of labor pain and the concomitant acceptance of obstetric anesthesia have had a ripple effect creating the conditions for acceptance of other often unnecessary and sometimes risky obstetric treatments forceps the chemical induction and augmentation of labor episiotomy electronic fetal monitoring and Cesarean section As American women make decisions about anesthesia today Deliver Me from Pain offers them insight into how women made this choice in the past and why each generation of mothers has made dramatically different decisions
