Canning, 2022-10-20 Vive la Sociale This rousing revolutionary statement written on a bright red banner across the top of James Ensor's Christ's Entry into Brussels in 1889 served as a visual manifesto and call to action by the Belgian artist 1860-1949 one that announced with an insistent public voice the centrality of his art practice to the cultural discourse of modern Belgium This provocative declaration serves as the title for this new study of Ensor's art focusing on its social discourse and the artist's interaction with and at times satirical encounter with his contemporary milieu Rather than the alienated and traumatized Expressionist given preference in modern art history Ensor is presented here as an artist of agency and purpose whose art practice engaged the issues and concerns of middle class Belgian life society and politics and was informed by the values and class race and gendered perspectives of his time Ensor's radical vision and oppositional strategy of resistance self-fashioning and performance remains relevant This book with its timely nuanced reading of the art and career of this often misunderstood artist's artist invites a re-evaluation not only of Ensor's social context and expressive critique but also his unique contribution to modernist art practice

Architecture in Development Aggregate Architectural History Collaborative, 2022-04-25 This extensive text investigates how architects planners and other related experts responded to the contexts and discourses of development after World War II Development theory did not manifest itself in tracts of economic and political theory alone It manifested itself in every sphere of expression where economic predicaments might be seen to impinge on cultural factors Architecture appears in development discourse as a terrain between culture and economics in that practitioners took on the mantle of modernist expression while also acquiring government contracts and immersing themselves in bureaucratic processes This book considers how for a brief period architects planners structural engineers and various practitioners of the built environment employed themselves in designing all the intimate spheres of life but from a consolidated space of expertise Seen in these terms development was to cite Arturo Escobar an immense design project itself one that requires
