Gijssels, Richard G. Milder,2012-03-19 Core concepts in education are changing For example professional performance or expertise is not uniquely the fruit of specialist knowledge acquired at professional schools but the sum of influences exerted by a complex web of continuous learning opportunities for which an individual is well or ill prepared by their schools and their workplace The key contributory factors to professional expertise are how professional schools connect to professional practice how schools prepare graduates for continuous learning and how the workplace endorses continuous development Thus the question this volume addresses how to design learning and working environments that facilitate the integration of these three elements is at the heart of contemporary pedagogical theory The authors also ask a second vital question how do we educate learners that go on to maximize their life s learning opportunities by regulating their own ongoing learning Learning at the Crossroads of Theory and Practice argues that with the theory of learning at a crossroads this is an unprecedented opportunity for learning about learning The book sheds light on different elements of this challenge integrating theory and practice in business education generating and fully exploiting workplace learning opportunities and enriching our classrooms by coupling theoretical knowledge with the richness of real life experience *Linking Theory and Practice of Digital Libraries* Wolf-Tilo Balke,Koraljka Golub,Yannis Manolopoulos,Kostas Stefanidis,Zheyang Zhang,2025-09-22 This book constitutes the refereed proceedings of the 29th International Conference on Theory and Practice of Digital Libraries on Linking Theory and Practice of Digital Libraries TPDL 2025 held in Tampere Finland during September 23 26 2025 The 14 full papers and 11 finding papers included in this book were carefully reviewed and selected from 103 submissions The papers are organized in the following topical Keynotes Large Language Models Scholarly Issues Citation Management Digital Archives Digital Humanities and Cultural Heritage Knowledge Graphs
